

FREE LITERATURE

Biological Materials. Biological Specialty (Lansdale, PA) offers a brochure listing products such as anticoagulants, source plasma (human), disease-state plasma, and normal mother's milk. The products, shipped in either dry ice, wet ice, or at ambient temperature, are guaranteed for delivery within 24 hrs.

Radioactivity Monitor. The B-RAM flow-through monitor from IN/US Service (Fairfield, NJ) measures radioactivity in HPLC eluates. As described in a new brochure, it is capable of simultaneous measurement and data handling for two isotopes together with the outputs from one or two chromatography mass detectors.

Growth Factors. Upstate Biotechnology (Lake Placid, NY) has a brochure highlighting natural and recombinant growth factors, antibodies, serum-free culture supplements, and cell adhesion proteins. Products include recombinant human EGF, basic FGF, PDGF, and cell adhesion reagents such as virally inactivated human fibronectin and rat tail collagen.

Light Sources. Ori-el (Stratford, CT) announces its 460-page guide to light sources, monochromators/spectrographs, and detection equipment. A 50-page technical discussion section, schematic illustrations, and photographs highlight over 1,000 products including arc-lamp power supplies, diode-array detectors, and data acquisition systems for scanning monochromators.

Fluorescence Reagents. Jackson ImmunoResearch (West Grove, PA) offers a catalog of phycoerythrin (PE)-conjugated secondary antibodies and PE-conjugated streptavidin for multiple-labeling experiments. PE is excited by wavelengths of 545 nm and 565 nm and fluoresces at 575 nm.

Axial Flow Impeller. A two-page, four-color brochure (Bulletin B-641) from Mixing Equipment (Rochester, NY) features the Lightnin® A315 impeller, which provides 30-percent-greater mass-transfer coefficients than Rushton impellers at equal torque and power consumption. The impeller is ideal for shear-sensitive applications, since its maximum shear rates are one-fourth that of Rushton impellers.

Immunochemicals. Zymed Laboratories' (South San Francisco, CA) 96-page 1989-1990 catalog of immunochemical products features over 700 entries. Indexes and a Methods and Procedures section aid users in selecting products such as Western and Southern blot staining kits, colloidal gold reagents, affinity-purified antibodies and conjugates, and purified antigens.

Peptides and Antisera. The '89-'90 UCB Bioproducts S.A. catalog from American Biochemicals (San Diego, CA) includes purified biologically active peptides, human and animal hormones, and antisera for both RIA and immunohistochemistry. UCB manufactures custom peptides in bulk and sells protected amino acids and peptides for in-house synthesis.

Radiochemicals. The 1989 radiochemicals catalog from Sigma Chemical (St. Louis, MO) contains an expanded list of biochemicals including ¹⁴carbon-labeled amino acids, carbohydrates, methylated proteins and molecular weight markers, and tritium-labeled nucleotides. It includes autoradiographic and photographic supplies.
