Formulated Drug Testing. The use of liquid chromatography in purity and stability testing of bulk and formulated pharmaceuticals is reviewed in a 20-page technical bulletin from Perkin-Elmer (Norwalk, CT). It details specific requirements for assays in light of USP guidelines for methods validation.

Antigens and Antibodies. The 1990 Chemicon (Temecula, CA) catalog describes immunochemical reagents and purified antigens for neuroscience, cytoskeletal, basement membrane, and infectious-disease research. New products include MAbs for choline acetyltransferase, HIV-1 gp120, and estrogen, progesterone, and Vitamin D receptors. Polyclonal antibodies to galanin, neuropeptide Y, and cardio-excitatory peptide are also listed.
