

ERRATA

In Pinner & Sahai (10, 127–137; 2008), the last columns of figures 4c and 4d were mislabelled. The correct version of these figures are shown below and have been corrected online.

In Cox *et al.* (10, 149–159; 2008), figure 5b was labelled incorrectly for the presence of LLnL or colchicine. The corrected panel is shown below and this has also been corrected online.

In Yang *et al.* (10, 138–148; 2008), an error was introduced in the second paragraph on page 140. The correct sentence is: “FOXO3a protein levels were significantly reduced after approximately 2 h, but remained stable for 7 h when treated with the MEK inhibitor, U0126 (Fig. 1i)”. This has been corrected online.
