

## Corrections

### **Morano et al.**

We would like to amend the author list in “Smooth-muscle contraction without smooth-muscle myosin” by Morano *et al.* (*Nature Cell Biol.* 2, 371–375). The full list should read: Ingo Morano, Gui-Xuan Chai, Leonidas G. Baltas, Valeria Lamounier-Zepter, Gudrun Lutsch, Monika Kott, Hannelore Haase, Thomas Walther and Michael Bader. Ingo Morano, Gui-Xuan Chai and Leonidas G. Baltas contributed equally to the work.

### **Friedlander et al.**

In Figure 7 of “A regulatory link between ER-associated protein degradation and the unfolded-protein response” by Friedlander *et al.* (*Nature Cell Biol.* 2, 379–384) the lowermost panel was incorrectly labelled as showing a  $\Delta ire1\Delta hrd1$  mutant. It in fact shows a  $\Delta ire1\Delta ubc7$  strain, as described in the figure title.
