Some information was omitted from **Table 1** of this article. The table should have indicated that the first report of cells (macrophages) generating nitrite and nitrate was published in 1985 by Stuehr and Marletta (Stuehr, D.J. & Marletta, M.A., Mammalian nitrate biosynthesis: mouse macrophages produce nitrite and nitrate in response to *Escherichia coli* lipopolysaccharide, *Proc. Natl. Acad. Sci. USA* **82**, 7738–7742, 1985).
