CORRIGENDUM: Assignment of protein function in the postgenomic era

Alan Saghatelian & Benjamin F Cravatt

Nat. Chem. Biol. 1, 130–142 (2005)In **Table 1**, all reference numbers should be increased by 1, as shown.**Table 1** List of ABPP probes and their respective enzyme targets

	Structure	Enzyme class	Electrophile/ Photo-cross-linker	References
Directed		Serine hydrolases	Electrophile	24,25,27
		Cysteine proteases	Electrophile	38,39,41
		Proteasome	Electrophile	46
		Cathepsins	Electrophile	37
		Ubiquitin hydrolases	Electrophile	40
		Metalloprotease	Photo-cross-linker	42
		Metalloprotease	Photo-cross-linker	43
		γ-secretase	Photo-cross-linker	44
		Serine/threonine phosphatases	Electrophile	48
		Tyrosine phosphatases	Electrophile	47
Nondirected		Glycosidases	Electrophile	50
		Kinases	Electrophile	49
		Oxidoreductases Enoyl-CoA hydratases Glutathione-S-transferases (GSTs) Hydroxypyruvate reductase GSTs	Electrophile	51–53 36
