This Article contains typographical errors in the equations of the last sentence of the first paragraph of the Results section. This sentence should read 'In the present case, the spin-orbit transversally induced dipole is given by  $p_y = \alpha_{yx} E_x^0 = [\epsilon_{yx} \alpha_{yy} \alpha_{xx} / (\epsilon_0 - \epsilon_m)^2] E_x^0$  (considering the circular shape of our nanoantennas,  $\alpha_{yy} = \alpha_{xx}$ , that is, the two LPRs resonate at the same wavelength, and the expression above can be simplified to  $p_y = \alpha_{yx} E_x^0 = [\epsilon_{yx} \alpha_{xx}^2 / (\epsilon_0 - \epsilon_m)^2] E_x^0$ .'
