## Shortage of human intravenous immunoglobulin—reasons and possible solutions

Jagadeesh Bayry, Michel D Kazatchkine and Srini V Kaveri

Nature Clinical Practice Neurology (2007) 3: 120–121 [doi:10.1038/ncpneuro0429]

## CORRIGENDUM

In the March 2007 issue, in the Viewpoint article by Bayry *et al.*, page 121, the sentence "Fc $\gamma$ RII, Fc $\gamma$ RIIIa and Fc $\gamma$ RIIV are activating receptors, whereas Fc $\gamma$ RIIIb and Fc $\gamma$ RIIIb are

inhibitory receptors" should have read "Fc $\gamma$ RI, Fc $\gamma$ RIIIa, Fc $\gamma$ RIIIb and Fc $\gamma$ RIV are activating receptors, whereas Fc $\gamma$ RIIb is an inhibitory receptor".
