## Erratum: Intense and highly localized gene conversion activity in human meiotic crossover hot spots

A J Jeffreys & C A May  
*Nat. Genet.* 36, 151–156 (2004).

In the version of this paper initially published online, several lines were missing from the bottom of each page of the **Supplementary Note**. This mistake has been corrected online.

---

## Corrigendum: Gene expression–based high-throughput screening (GE-HTS) and application to leukemia differentiation

K Stegmaier, K N Ross, S A Colavito, S O'Malley, B R Stockwell & T R Golub  
*Nat. Genet.* 36, 257–263 (2004).

Brent Stockwell is affiliated with The Whitehead Institute for Biomedical Research, Cambridge, Massachusetts 02139, USA and is not affiliated with The Eli and Edythe L. Broad Institute.

---

## Corrigendum: The *hyh* mutation uncovers roles for $\alpha$ Snap in apical protein localization and control of neural cell fate

T H Chae, S Kim, K E Marz, P I Hanson & C A Walsh  
*Nat. Genet.* 36, 264–270 (2004).

The protein designated INADL throughout the paper should instead be called Pals1.
