

Genetic variation in the gene encoding calpain-10 is associated with type 2 diabetes mellitus

Y Horikawa *et al.*

Nature Genet. 26, 163–175 (2000).

Inconsistency between software programs resulted in a shifting of some numbers from one column to another. The correct version of Table 2 follows.

Table 2 • Association with the evidence for linkage in affected sib pairs

UCSNP	Group	lod	Genotype							
			1/1	1/2		2/2		Empiric P-value		
			n pairs	Empiric P-value	lod	n pairs	Empiric P-value		lod	n pairs
