Primary surface ruptures of the great Himalayan earthquakes in 1934 and 1255

S. N. Sapkota, L. Bollinger, Y. Klinger, P. Tapponnier, Y. Gaudemer and D. Tiwari

Nature Geoscience **6**, 71–76 (2013); published online 16 December 2012; corrected after print 15 January 2013.

In the version of this Article originally published, in the last paragraph under the heading ‘Rupture length and return time of $M > 8$ events in Nepal’ the third sentence should have read: “Damage caused by focused SmS seismic phase arrivals²¹ and widespread liquefaction diverted attention to the Ganges Plain”. This has been corrected in the PDF and HTML versions of the Article.
