Geochemical evidence for enhanced fluid flux due to overlapping subducting plates

HITOMI NAKAMURA, HIKARU IWAMORI AND JUN-ICHI KIMURA

Nature Geoscience **1**, 380–384 (2008)

In the Methods section and the Supplementary Information, the value of $^{207}\text{Pb}/^{204}\text{Pb}$ in altered oceanic basaltic crust for the Philippine Sea plate was incorrectly given as 15.629. The correct value is 15.4642. Also in the Methods section, the value of the sediment fluid/AOC fluid ratio for the Pacific plate fluid should have been given as 40:60, and on page 2 of the Supplementary Information, the value of dehydration from sediments at depths of greater than 30 km should have been given as 3.0 wt.%.
