Costimulation and endogenous MHC ligands contribute to T cell recognition

Christoph Wülfing *et al.*

Nature Immunology **3**, 42–47 (2002).

In the January issue of *Nature Immunology* some text was printed incorrectly. In footnote “a” to Table 3, lines 6–7 should read “The concentration $<45/\mu\text{m}^2$ is $35\pm9/\mu\text{m}^2$; $>60/\mu\text{m}^2$ is $67\pm9/\mu\text{m}^2$ ”.
