
Retraction: The helminth product ES-62 protects against septic shock via Toll-like receptor 4–dependent autophagosomal degradation of the adaptor MyD88

Padmam Puneet, Mairi A McGrath, Hwee Kee Tay, Lamyaa Al-Riyami, Justyna Rzepecka, Shabbir M Moochhala, Shazib Pervaiz, Margaret M Harnett, William Harnett & Alirio J Melendez

Nat. Immunol. 12, 344–351 (2011); published online 27 February 2011; retracted 24 June 2011

The authors wish to note the following. Irregularities have been identified in some of the figures in this paper. The conclusions drawn from these data, that ES-62 protects against the development of pathology in the sepsis models and results in the induction of autophagy in macrophages, cannot be made. As these conclusions constitute major components of the paper, we wish to retract this paper.

Addendum: Defeating sepsis by misleading MyD88

Katherine A Smith & Rick M Maizels

Nat. Immunol. 12, 284–286 (2011); published online 21 April 2011; addendum published after print 24 June 2011
