

Our work is someone's hope. Join us in Boston.

www.merckboston.com

Research Associates have never had a better opportunity to work with leading scientists in Alzheimer's Disease, Molecular Oncology, Chemistry, Drug Metabolism/Pharmacokinetics, Histology, Assay Development/HTS, Pharmacology/Oncology and Cancer Biology.

- Support** existing therapeutic candidates
- Help** discover new targets
- Grow** from exposure to all aspects of drug discovery
- Work** on multidisciplinary teams
- Employ** some of the world's best technology

Enjoy the company of really smart people who are dedicated, team-oriented and passionate about their research. Apply online today.

Passionate about *Cardiovascular & Metabolic Disease*

Career opportunities for Discovery Research in Cardiovascular and Metabolic Diseases
Wyeth Research in Cambridge, MA and Collegeville, PA.

The Cardiovascular and Metabolic Diseases group is taking on the number one health threat in the developed world by advancing a new generation of therapeutics through a combination of innovative science and dedicated researchers.

Our collaborative and rewarding culture is the driving force behind one of the world's most innovative research pipelines in Type 2 Diabetes, Obesity, Metabolic Syndrome, Thrombosis, Heart Failure, Atherosclerosis/Dyslipidemia, Vascular Diseases and Arrhythmias.

We are committed to scientific excellence and are passionate about discovering cures for these devastating diseases. If you share our passion for finding the next generation of drugs to treat Cardiovascular and Metabolic Diseases, please e-mail your resume to wyeth@trackcareers.com (Source Code: OPNAT) or visit our website at www.wyeth.com/careers.

An Equal Opportunity Employer, Wyeth fosters a diverse and inclusive workplace. M/F/D/V

Life presents challenges.
Diabetes shouldn't be one of them.

Working for a better tomorrow, today.

At Charles River Laboratories, we take a passionate approach to improving human and animal health. Our motivating force is the knowledge that our work provides people with the potential to live healthier and better lives. The fact is, more than 18 million people living with diabetes rely on our research and methods to ultimately present them with both help and hope. And by advancing the search for drug discovery and development, we do just that.

Preclinical Services, Massachusetts, continues to grow with new ideas and initiatives to help fight diabetes and other diseases. We are the premier provider of scientific and technical expertise to the pharmaceutical and biotech industry, partnering with our clients in the development of a compound or biomolecule from the early phases of discovery throughout development and into clinical trials.

We are expanding into our new, world-class, state-of-the-art facility in Shrewsbury, MA, which will establish us as a Preclinical Services Center of Excellence. We are doubling in size, and are looking to augment our existing scientific, veterinary and technical professionals with new staff who will bring a diverse wealth of experience from the pharmaceutical, biotech and CRO industries.

If you are looking for an exciting opportunity that will help shape the future - you'll want to connect with Charles River Laboratories, Preclinical Services, Massachusetts today.

Discovery Sciences

- Pharmacology
- Metabolism & Pharmacokinetics

Safety Sciences

- Toxicology
- Safety Pharmacology
- Immunotoxicology

Laboratory Sciences

- Bioanalytical Chemistry
- Immuno Chemistry
- InVitro ADMET

Pathology

- Toxicologic Pathology

Please forward your resume to hr.wor@us.crl.com. An affirmative action/equal opportunity employer.

Small Molecules. Huge Discoveries.

Vertex Pharmaceuticals Incorporated is a global biotechnology company focused on the discovery, development and commercialization of breakthrough drugs for a range of serious diseases. Our business strategy is to commercialize major new drugs both independently and in collaboration with other pharmaceutical companies. We currently have the following opportunities in our **Cambridge, MA** location.

Biomarker Research and Translational Pharmacology

Sr. Research Associate, 4200-01B

Proteomics

Senior Research Scientist, 4210-01B

Cellular and Molecular Biology

Research Scientist II, 4120-01B

We provide a highly stimulating working environment coupled with a high level of professional and intellectual challenge. In addition to competitive salary and benefits, we also offer equity participation and participation in a stock purchase program. No agencies, please. Apply online at: www.vrtx.com. EOE

We Enjoy a Big Lead in Small Molecules.

DIRECTOR OF RESEARCH AFFAIRS
Harvard University

Harvard University's Bauer Center for Genomics Research (www.cgr.harvard.edu) seeks a Director of Research Affairs to play a leading role in the center. The Bauer Center is an intensely collaborative, interdisciplinary center, where scientists from a wide variety of backgrounds study cellular pathways and networks, with the goal of finding general principles underlying the structure, behavior and evolution of cells and organisms. In close collaboration with the Scientific Director, the Director of Research Affairs will develop and communicate a strategic vision for the center, raise funds, hire Fellows, assist with the recruitment of new faculty for the Systems Biology initiative, and provide outreach to faculty. The successful candidate will have a broad scientific background, with a Ph.D. in biology or a related field. Familiarity with systems biology and/or genomics is essential. Other requirements are excellent written and verbal communication skills; experience in grant writing; the ability to communicate with scientific and lay audiences; strong general administrative skills; and a demonstrated ability to manage a program of this scope.

Please send resumés to: **George Busby, Bauer Center for Genomics Research, Harvard University, 7 Divinity Avenue, Cambridge, MA 02138** or electronically to gbusby@cgr.harvard.edu

Harvard University is an Affirmative Action/Equal Opportunity Employer.
