

The Challenge

Exciting frontiers
from Alaska to
Australia

You

Technical
expertise and
a passion to learn

BP

Industry-leading
technologies
and teamwork

We're hiring now

We're looking for Explorers, Geologists, Geoscientists, Geophysicists, Petroleum Engineers, Petrophysicists, Reservoir Engineers and Technologists.

Our award-winning seismic imaging technology, industry-leading Pushing Reservoir Limits technologies, state-of-the-art Field of the Future™ technologies, the capital investment to drill and develop, access to some of the world's most interesting hydrocarbon basins and our exploration heritage combine to create the perfect environment for subsurface professionals.

We're looking for subsurface professionals with outstanding technical skills and a passion to learn from and collaborate across our world-class multi-disciplinary teams. With BP, you'll get to explore exciting new frontiers, work as part of an amazing team and have the opportunity to make a positive impact on the world.

BP's exploration heritage and success has led to an exciting portfolio of career opportunities across the globe – from exploring new territories to maximizing the yield from existing basins. So if you've got the experience and are interested in the challenge, check out what we have to offer.
