

## ERRATUM: Junkyard PCR

Michael Eisenstein

*Nat. Methods* 3, 8–9 (2006).

In the version of this article originally published, it was indicated that two groups, Braun & Libchaber (*Phys. Rev. Lett.* **89**, 188103; 2002) and Krishnan *et al.* (*Science* **298**, 793; 2002) independently developed the method of convective PCR in 2002. Although Braun & Libchaber discuss the theoretical potential for convective DNA amplification in their 2002 paper, the article by Krishnan *et al.* actually describes an apparatus for convective PCR. Libchaber's group described a convective apparatus the following year (*Phys. Rev. Lett.* **91**, 158103; 2003).
