
Corrigendum: High frequency, synchronized bursting drives eye-specific segregation of retinogeniculate projections

Christine L Torborg, Kristi A Hansen & Marla B Feller
Nat. Neurosci. 8, 72-78 (2005)

A sentence in the discussion of this paper contained some inaccurate references.

The second sentence (first column) on page 76 should read “First, local infusion of general nAChR antagonists directly into the dLGN during the first postnatal week does not prevent eye-specific segregation²”.

The authors regret the error.

Corrigendum: A representation of the hazard rate of elapsed time in macaque area LIP

Peter Janssen & Michael N Shadlen
Nat. Neurosci. 8, 234-241 (2005)

In the Methods section, equation 4 contained an error.

The corrected version should read as follows:

$$\tilde{f}(t) = \frac{1}{\phi t \sqrt{2\pi}} \int_{-\infty}^{\infty} f(\tau) e^{-(\tau-t)^2/(2\phi^2 t^2)} d\tau$$

The authors regret the error.
