CORRIGENDUM

Targeting the protein kinase C family: are we there yet?

Helen J. Mackay & Christopher J. Twelves

Nature Reviews Cancer 7, 554–562 (2007)

On page 554 of this article, PKC α is listed erroneously. On page 555, the schematic of the atypical kinase in Figure 1 should show a C1-like domain, not a C2-like domain. On page 556, Figure 2 should have shown PKC μ as protein kinase D, a member of the Cam kinase family, and the arrow depicting import of HDAC7 should have shown export. The corrected figures are shown below.

Figure 1 | Schematic representation of protein kinase C isozyme structure and classification.

Figure 2 | Proposed effects of protein kinase C activation.
