Genomic imprinting: the emergence of an epigenetic paradigm

Anne C. Ferguson-Smith

Nature Reviews Genetics 12, 565–575 (2011)

In figure 1Aa of the above article, the imprinting control region (ICR) on the paternal allele of the *Airn* gene was incorrectly shown as methylated (indicated by a dark grey octagon). This ICR should be shown as unmethylated (indicated by a white octagon). The corrected article is available at: <http://www.nature.com/nrg/journal/v12/n8/full/nrg3032.html>. The editors apologize for this error.
