NK CELLS IN HIV INFECTION: PARADIGM FOR PROTECTION OR TARGETS FOR AMBUSH

Anthony S. Fauci, Domenico Mavilio and Shyam Kottlil

Nature Reviews Immunology 5, 835–843 (2005)

When published, the thirteenth row in Table 1 contained incorrect information. The corrected row (together with the column headings) is shown below.

Receptor	Function	Ligand specificity	Effect of HIV viraemia on NK-cell-receptor expression	Effect of ART on NK-cell-receptor expression	Refs
NKp46 (NCR1)	Activating	Influenza-virus haemagglutinin, others unknown?	Decrease	Restoration to normal levels	6,36, 62,64
