

ERRATUM

CHROMATIN AND *CD4*, *CD8A* and *CD8B* GENE EXPRESSION DURING THYMIC DIFFERENTIATION

Dimitris Kioussis and Wilfried Ellmeier

Nature Reviews Immunology **2**, 909–919 (2002)

Three figures in this article are labelled incorrectly.

- In Figure 3b, page 913, the second and third transgenic constructs should have the following activity patterns in the thymus: for the second construct, DN + DP + CD4 + CD8 +; for the third construct, DN – DP – CD4 + CD8 +.
- In Figure 4a, page 915, the labels for *Cd8a* and *CD8b* should be reversed, such that *Cd8b* lies upstream of *Cd8a*.
- In Figure 5, page 917, the second chromatin structure should be labelled as CD4⁻CD8⁺ ISP, not as CD4⁻CD8⁻ ISP.
