## Transcriptional regulation of hepatic lipogenesis

*Yuhui Wang, Jose Viscarra, Sun-Joong Kim and Hei Sook Sul*

*Nature Reviews Molecular Cell Biology* **16**, 678–689 (2015)

In the original article, the reference citation (reference 71) in the following sentence on page 683 was incorrect: “Under hyperglycaemic and hypoinsulinaemic conditions, LXRs maintain the ability to upregulate the expression of glycolytic and lipogenic enzymes, including glucokinase, SREBP1C, ChREBP $\alpha$  and ChREBP $\beta$ ”. The correct reference citation (reference 75) has now been added to the online version of this article.
