The HSP70 chaperone machinery: J proteins as drivers of functional specificity

Harm H. Kampinga & Elizabeth A. Craig

Nature Reviews Molecular Cell Biology 11, 579–592 (2010)

On page 583 of the above article there is a mistake in the sentence "...the mitochondrial HSP70 (scSsc1 or hsHSPA9 (also known as GRP75)) and the NEF (scMge1 or hsBAP (also known as SIL1)) that form this 'import motor'...". The human mitochondrial NEF is actually GRPE1 and not BAP.
