CORRIGENDUM

Asymmetric cell division in land plants and algae: the driving force for differentiation

Ive De Smet and Tom Beeckman

Nature Reviews Molecular Cell Biology **12**, 177–188 (2011)

On page 183 of this article there was a mistake in the sentence “These include the genes encoding the transcription factors *PROTODERMAL FACTOR 2* (*PDF2*)^{18,85} and *ARABIDOPSIS THALIANA MERISTEM LAYER 1* (*ATML1*)^{18,86} and the LRR receptor-like kinase *ARABIDOPSIS CRINKLY 4* (*ACR4*)^{87,88}.” *ACR4* is not an LRR family protein. This has been corrected online.
