ERRATUM

Capping protein regulators fine-tune actin assembly dynamics

Marc Edwards, Adam Źwolak, Dorothy A. Schafer, David Sept, Roberto Dominguez and John A. Cooper

Nature Reviews Molecular Cell Biology **15**, 677–689 (2014)

On page 684 of the above article, there was a mistake in Figure 3b: the PH domain of CARMIL preferentially binds to monophosphorylated membrane lipids rather than to PtdIns(3)P, PtdIns(3,4)P₂ or PtdIns(3,4,5)P₃. This has been corrected online. We apologize for any confusion caused to readers.
