ERRATUM

Slowly (translate) but surely (translocate)

Eytan Zlotorynski

Nature Reviews Molecular Cell Biology <http://dx.doi.org/10.1038/nrm3921> (2015)

The last sentence of the penultimate paragraph stated that the efficiency of translation decreased when a REST sequence was changed to optimal codons. It should have stated that the efficiency of translocation decreased in this setting. This has now been corrected online. The editors apologize for any confusion caused.
