**CORRIGENDUM**

## Phenol-soluble modulins and staphylococcal infection

*Andreas Peschel and Michael Otto*

*Nature Reviews Microbiology* 11, 667–673 (2013)

In Figure 1 of the above article, the amino acid sequences for PSM $\alpha$ 4 in part **b** and PSM-mec in part **c** were transposed, and the amino acid sequences of  $\delta$ -toxin and PSM $\beta$ 2 in part **b** contained minor errors. The figure has now been corrected online and the authors apologize to readers for any confusion caused.
