
ERRATUM

WORKING MEMORY IN PRIMATE SENSORY SYSTEMS

Tatiana Pasternak and Mark W. Greenlee

Nature Rev. Neurosci. **6**, 97–107 (2005)

Reference 18 in this article was omitted. This reference is Pasternak, T. & Zaksas, D. Stimulus specificity and temporal dynamics of working memory for visual motion. *J. Neurophysiol.* **90**, 2752–2757 (2003).

Also in this article, in the sentence “Sekuler and colleagues used a different approach to examine the nature of stimulus representation in memory^{22,23}” we should not have referred to reference 23, but to a reference that was omitted. The omitted reference is Zhou, F., Kahana, M. J. & Sekuler, R. Short-term episodic memory for visual textures: a roving probe gathers some memory. *Psychol. Sci.* **15**, 112–118 (2004).
