The stress of misfolding

Darran Yates

Nature Reviews Neuroscience **13**, 290–291 (2012)

On page 291 of this highlight, the titles of the original papers were incorrectly given. The correct titles are 'Endoplasmic reticulum stress is important for the manifestations of α -synucleinopathy *in vivo*' and 'Accumulation of toxic α -synuclein oligomer within endoplasmic reticulum occurs in α -synucleinopathy *in vivo*'. These have been corrected in the online version.
