**ERRATUM**

## Retromer in Alzheimer disease, Parkinson disease and other neurological disorders

Scott A. Small and Gregory A. Petsko

*Nature Reviews Neuroscience* **16**, 126–132 (2015)

In the abstract for this article, the second line was incorrect. It should have read: 'First linked to Alzheimer disease, retromer dysfunction causes a range of pathophysiological consequences that have been shown to contribute to the core pathological features of the disease'. This has been corrected in the online version of the article.
