Hyponatremia and seizures caused by triamcinolone-induced adrenal insufficiency

Stefan Reuter, Niklas Scholten, Hermann Pavenstädt, Uta Hillebrand & Eckhart Büsselmaker

Reuter, S. *et al. Nat. Rev. Nephrol.* 6, 117–123 (2010); doi:10.1038/nrneph.2009.215

In the February 2010 issue of *Nature Reviews Nephrology*, the discussion on the differential diagnosis with respect to the cerebral salt-wasting syndrome was incomplete. The relevant section should read “However, the damage was neither acute nor was the patient volume-depleted, as indicated by low blood urea nitrogen and low serum uric acid levels (notably, low serum uric acid levels are also often observed in patients with cerebral salt-wasting syndrome, despite volume depletion).”
