

# Mechanism of metal activation of human hematopoietic prostaglandin D synthase

Tsuyoshi Inoue, Daisuke Irikura, Nobuo Okazaki, Shigehiro Kinugasa, Hiroyoshi Matsumura, Nobuko Uodome, Masaki Yamamoto, Takashi Kumasaka, Masashi Miyano, Yasushi Kai and Yoshihiro Urade

*Nat. Struct. Biol.* **10**, 291–296 (2003).

The  $y$ -axes of Fig. 3*a,b,d* in this manuscript were labeled incorrectly. The correct unit for the PDGS activity in these panels should be  $\text{mol min}^{-1} \text{mg}^{-1}$  protein. Additionally, the GST labels were incorrectly represented in Fig. 3*c*: s-GST should be  $\sigma$ -GST, a-GST should be  $\alpha$ -GST; m-GST should be  $\mu$ -GST; and p-GST should be  $\pi$ -GST. The authors apologize for any inconvenience this may have caused.
