

CORRIGENDUM

Epigenetic inactivation of *paired box gene 5*, a novel tumor suppressor gene, through direct upregulation of p53 is associated with prognosis in gastric cancer patients

Oncogene (2012) 31, 3482; doi:10.1038/onc.2012.185

Correction to: *Oncogene* (2012) 31, 3419–3430; published online 21 November 2011; doi:10.1038/onc.2011.511

Since the publication of the above manuscript, the authors have identified an error; the *PAX5* gene is located on chromosome 9p13, not 19p13 as stated in the article.
