CORRIGENDUM

Differential regulation of LncRNA-SARCC suppresses VHL-mutant RCC cell proliferation yet promotes VHL-normal RCC cell proliferation via modulating androgen receptor/HIF-2α/C-MYC axis under hypoxia

Oncogene (2017) 36, 4525; doi:10.1038/onc.2016.514; published online 3 April 2017

Correction to: *Oncogene* (2016) 35, 4866–4880; doi:10.1038/onc.2016.19; published online 14 March 2016

Since the online publication of this article, the authors have found that, during an internal quality control and accuracy lab process, there were errors of loading control for the immunoblot in Figure 3f and Supplementary S1a as well as incorrect arrangement of panels in Figure 1d.

The updated figures do not change the stated conclusions in the original *Oncogene* manuscript.

Below are the revised figures.

Authors would like to apologise for these unintentional mistakes which occurred due to the transfer of a large amount of data between two institutes (URMC in Rochester-USA and Shanghai-China) with two different computers during figure preparation by two co-first authors.
