The impact of allergic rhinitis on work productivity [*Prim Care Resp J* 2007; 16(2): 98-105]

Sheryl L Szeinbach, Enrique C Seoane-Vazquez, Andrew Beyer, P Brock Williams

See Editorial by Levy and Marshall on page 203

In our article entitled 'The impact of allergic rhinitis on work productivity'¹ which was published in this year's April issue of the *Primary Care Respiratory Journal (PCRJ)*, we were remiss in not acknowledging the use of the same data source, data collection and background literature that was used in our previous study addressing a different issue relating to lifestyle productivity which was published in the *Annals of Allergy, Asthma & Immunology (AAAAI)* in 2005.² We were also remiss in not referencing the previously published *AAAAI* paper in the manuscript which we submitted to the *PCRJ*.
