

## ANNOUNCEMENT

The third International Brain Heart Conference will convene in Trier on September 7-9 1985 as a Satellite Symposium of the XIIIth World Congress of Neurology in Hamburg on September 1-6. The Trier Symposium will continue in the tradition of the previous conferences in Jerusalem in 1980 (Chairman: Prof. S. Lavy) and in 1983 (Chairman: Prof. S. Stern).

Scientific Program Brain Heart Conference, September 7-9, 1985

Central Cardiovascular Control

Anatomic Aspects of Central Nervous Cardiovascular Regulation (A. D. Loewi, St. Louis, MO)

Autonomic Nervous System and Blood Pressure Control

Reflex Control of Circulation (A. Malliani, Milano/Italy)

Neurochemical Basis for Cardiovascular Control

Biogenic Amines and Neuropeptides (K. Fuxe, Stockholm/Sweden)

Effects of Brain Peptides on the Regulation of the Autonomic

Nervous System (T. Unger, Heidelberg/FRG)

Neuropeptides and Cardiac Function (R. E. Lang, Heidelberg/FRG)

Renin-Angiotensin System in the Brain (D. Ganten, Heidelberg/FRG)

Role of Endogenous Opioids in Central Cardiovascular Regulation

(A. I. Faden, Bethesda, MD)

Central Neural Control of the Systemic and Cerebral Circulations (D. J. Reis, New York, NY)

Central Neurochemical Alterations in Hypertension

Drugs Controlling Central Blood Pressure Mechanisms

Heart Failure and Neural Control

Neural Control of the Heart in Arrhythmias

*Further information:* Dr. T. Stober, Department of Neurology, Faculty of Medicine, University of Saarland D-6650 Homburg/Saar, FRG.
