

The Society for Pediatric Research and The American Pediatric Society gratefully acknowledge receipt of a grant from Ross Laboratories in support of planning and organization of the yearly research societies meeting. These funds have been used to computerize services for abstract processing and sessions scheduling, create author and subject index listings, inform submitters of program status, and to organize the Program Issue of Pediatric Research.

We accept again the contributions of Ross Laboratories to the scientific objectives of the societies; we especially want to recognize the tireless effort and expertise of

Rex Bickers, M.D.
Assistant Professor of Pediatrics (Neonatology)
Children's Hospital, Ohio State University
Columbus, Ohio

who, through the Ross grant, supervised and coordinated all computer based services in this effort. Without his help and determination, this new system could not have been implemented.
