

## Subject Index to Volume 22

- Achondrogenesis, type II, extracellular matrix abnormalities, 324
- Acid base balance, effect of maternal hyperglycemia on, fetal lamb, 355
- Acidosis, metabolic, during streptococcal group B sepsis, piglet, 509
- Adrenocorticotropin, response to corticotropin-releasing factor, during pubertal development, 41
- Airway, occlusion, genioglossus response, apneic *versus* nonapneic infants, 683
- L-Amino acids, branched chain, catabolism compared, cultured skin fibroblasts, 591
- Anaphylaxis, pertussis toxin-dependent, mouse, 262
- Antitrypsin, alpha-1, concentration in human milk, 268
- Aorta, thoracic, coarctation, renal perfusion after, puppy, 445
- Apnea  
airway occlusion, genioglossus response, apneic *versus* nonapneic infants, 683  
short, types and frequency, developmental study, term and preterm infants, 344
- Arginine, effect on creatine excretion, hyperornithinemia-hyperammonemia-homocitrullinuria syndrome, 364
- Asphyxia, perinatal, cerebral survival after, newborn sheep, 62
- Atrioventricular node, function, immature heart, dog, 616
- Behavior, fetus, 30 to 32 weeks gestation, 655
- Betamethasone  
effect on neutrophil chemotaxis, neonate, 150  
pulmonary compliance increased by, preterm rabbit, 730
- Bilirubin, effect on cerebral metabolism, newborn piglet, 135
- Bipyridine, derivatives, arteriolar resistance lowered by, neonatal lamb, 422
- Birth  
related events  
blood flow distribution and, 634  
effect on central blood flow patterns, 557
- Blood flow  
central, birth-related events and patterns of, 557  
distribution, birth-related events and, 634  
intracranial arterial, early postnatal changes, term infants, 461  
regional, cyanotic heart disease, neonatal lamb, 389
- Body water, estimated from total body electrical conductivity measurements, infants, 417
- Bone status, assessment, transmission ultrasonics used for, neonate, 541
- Bovine serum albumin, immunization, anaphylactic reaction, mouse, 262
- Brain  
cerebral arteries, developmental changes and hypoxic sensitivity, newborn lamb, 192  
cerebral metabolism, effect of bilirubin and sulfisoxazole, newborn piglet, 135  
oxidative metabolism, head position and, preterm and term neonates, 302  
postasphyxial cerebral survival, after oxygen free radical scavengers and calcium antagonist treatment, newborn sheep, 62
- Breath test, cholesteryl octanoate, pancreatic insufficiency detected by, rat, 257
- Bronchiolitis, respiratory mechanics, salbutamol effect, infants, 83
- Brush border membranes, dipeptide transport, glycylsarcosine and, rat kidney, 641
- Calcium  
dietary variations, effect on renal and intestinal calcium-binding proteins, 518  
homeostasis, role of magnesium, neonate, 319  
response to serum melatonin, neonatal rat, 414  
transport, developmental maturation, rat, 173
- Calcium antagonist, asphyxia treatment, cerebral survival after, newborn sheep, 62
- Cardiac output, intravenous catecholamine effect, unanesthetized hypoxemic newborn lambs, 667
- Carnitine, metabolism, in valproate-treated rats, effect of L-carnitine supplementation, 497
- $\alpha$ -Casein, local antibodies to, in infant saliva, 399
- Catecholamines  
endogenous, comparison, renal  $\beta$ -adrenoceptor vasodilation, sheep, 465  
intravenous, cardiac output and, unanesthetized hypoxemic newborn lambs, 667
- Cerebrospinal fluid, cortical subarachnoid, ventilation pressure effect on prostanooids in, newborn pig, 647
- Chediak-Higashi syndrome, neutrophils, normal-sized lysosomes in, 208
- Chlorpromazine, peroxisomal proliferation caused by, heart and liver, mouse, 748
- Cholesterol, deprivation, alterations in small intestine after, piglet, 330
- Cholesteryl octanoate, breath test, pancreatic insufficiency detected by, rat, 257
- Chromatid, sister exchange, vitamin K<sub>1</sub> and, human leukocytes and fetal sheep cells, 405
- Citrulline, effect on creatine excretion, hyperornithinemia-hyperammonemia-homocitrullinuria syndrome, 364
- Collagen  
lung maturation related to, fetal sheep, 339  
ontogenesis, in fetal lung, sheep, 335
- Colon, neonatal, short chain fatty acid profile by fecal water analysis, pig, 720
- Complement  
activation, effect of *Haemophilus influenzae* type b lipopolysaccharide on, 659  
C3 converting factor, meningococcal septicemia and, case report, 123
- Corticotropin-releasing factor, adrenocorticotropin, cortisol, and dehydroepiandrosterone response, during pubertal development, 41
- Cortisol, response to corticotropin-releasing factor, during pubertal development, 41
- Cranium, irradiation, role of growth hormone in stunted head growth after, 402
- Cyclooxygenase, effect on pulmonary function, group B streptococcal sepsis, piglet, 478
- Cysteine, levels, developing kidney, rat, 605
- Cystic fibrosis  
altered antibody isotype in, response to polysaccharide antigens, 708  
heterozygotes, sweat hyposcretion in, 271  
mucoid *Pseudomonas aeruginosa*, susceptibility to nonopsonic phagocytosis, 429  
*Pseudomonas aeruginosa* pulmonary infection, immunohistological evaluation, 743  
serum opsonic activity, correlation with colonization and disease state, 383  
tracheobronchial mucin, biochemical properties, 545
- Dehydroepiandrosterone, response to corticotropin-releasing factor, during pubertal development, 41
- Dexamethasone, somatomedin C/insulin-like growth factor I and, in insulin resistance, 188
- Diaphragm, muscle fiber type, development, swine, 449
- Diarrhea, rotavirus, protein transport during, mice, 72
- Diet  
calcium variations, effect on renal and intestinal calcium-binding proteins, 518  
high fat, peroxisomal proliferation caused by, mouse heart and liver, 748
- Dipeptide, transport, renal brush border membranes, rat, 641
- DNA, protein synthesis and, developing rat pancreas, 34
- Docosahexaenoic acid, uptake, related to intake and mode of administration, preterm infants, 292
- Down syndrome, humoral and cell-mediated immunity, age-related changes, 536
- Drugs, nonsteroidal antiinflammatory, constriction of ductus arteriosus by, fetal rat, 567
- Ductus arteriosus, constriction, nonsteroidal antiinflammatory drugs and, fetal rat, 567
- Eicosapentaenoic acid, uptake, related to intake and mode of administration, preterm infants, 292
- Elastin  
lung maturation related to, fetal sheep, 339  
ontogenesis, in fetal lung, sheep, 335
- Electrical conductivity, total body, fat-free mass and total body water estimated from, infants, 417

- Embryo, dorsal aortic flow, effect of heart rate increase, chick, 442
- Enterectomy, proximal, cellular adaptation of small intestine after, rat, 29
- Enzyme  
cell type-specific reactivities, ontogeny, in kidney collecting ducts, 504  
microvillous, after proximal enterectomy, 29  
protein, absence, in tyrosinemia, 394
- Erythrocyte  
membrane fluidity, changes, obese children, 141  
prolidase subunit absent in, patient with prolidase deficiency, 627
- Escherichia coli*, adherence to intestinal tract, inhibition by human milk, guinea pig, 130
- Estradiol-17 $\beta$ , effect on lung maturation, ovine fetus, 145
- Estrogen, effect on lung maturation, ovine fetus, 145
- Ethyl 2[5(4-chlorophenyl)pentyl]oxiran-2-carboxylic acid, peroxisomal proliferation caused by, mouse heart and liver, 748
- European Society for Paediatric Gastroenterology and Nutrition, abstracts of annual meeting, 96
- European Society for Pediatric Research, abstracts of annual meeting, 217
- Eye, vitamin E disposition in, cats, 16
- Fat, absorption, taurine supplementation effect, preterm infants, 67
- Fat-free mass  
estimated from total body electrical conductivity measurements  
infants, 417
- Fatty acid, short chain, fecal water analysis, colon, newborn pig, 720
- Fetus  
acid base balance and lung liquid production, effect of maternal hyperglycemia on, lamb, 355  
atrial natriuretic polypeptide in, ontogeny and characterization, rat, 115  
behavior, 30 to 32 weeks gestation, 655  
cardiac output, insulin effect, lamb, 168  
circulation, leukotrienes and, 350  
cyclic adenosine monophosphate content, milrinone effect, rabbit, 282  
development, transforming growth factor role, sheep, 609  
ductus arteriosus constriction, nonsteroidal antiinflammatory drugs and, rat, 567  
early development, structure and abundance of cartilage proteoglycans during, 409  
growth and development, maternal hyperinsulinemia and, rat, 432  
heart, development of myocardial contractile system, rabbit, 201  
heart and great vessels, *in situ* morphology, rat, 573  
hypotrophic, serum growth-promoting activity, 39  
insulin-like growth factor I concentration, glucocorticoid effect, rat, 92  
intravenous nutritional supplementation, effect on growth retardation, sheep, 55  
kidney, action of atrial natriuretic peptide, sheep, 11  
lactate metabolism, perfused heart, pig, 552
- lung  
elastin and collagen ontogenesis, sheep, 335  
maturation, elastin and collagen related to, sheep, 339  
maturation, estradiol- $\beta$  effect, sheep, 145  
temporal linkage of glycogen and saturated phosphatidylcholine, type II cells, rat, 79  
myocardial mechanical function, milrinone effect, rabbit, 282  
plasma,  $\alpha$ 1-protease inhibitors in, mice, 1  
protein synthesis and leucine oxidation, ontogenetic changes in rates of, 688  
small intestine, damage prevented by mannan and other sugars, rat, 703  
somatomedin immunocytochemistry in, 245  
utilization of metabolites by, fed and starved rats, 6  
ventricle, response to filling and arterial pressure and to *in utero* ventilation, lamb, 621  
vitamin K deficiency, mutagenic events reduced by, 405
- Fibroblasts, cultured human skin, catabolism of branched-chain L-amino acids in, 591
- Genioglossus, response to airway occlusion, apneic *versus* nonapneic infants, 683
- Germinal matrix, quantitative analysis, intracerebral hemorrhage and, newborn puppy, 23
- Glucocorticoids, effect on plasma insulin-like growth factor I concentration, rat fetus, 92
- Glucose, metabolism, placenta, effect of insulin, glucose, and ketone bodies, rat, 483
- Glutathione, levels, developing liver, rat, 605
- Glycogen, saturated phosphatidylcholine and, fetal lung type II cells, rat, 79
- Glycosylation, intestinal, developmental changes, rat, 250
- Glycylsarcosine, dipeptide transport and, renal brush border membranes, rat, 641
- Great vessels, *in situ* morphology, fetal and newborn rat, 573
- Growth and development  
atrioventricular nodal function, immature heart, dog, 616  
developing kidney and liver, cysteine and glutathione levels, rat, 605  
diaphragmatic muscle fiber type, swine, 449  
humoral and cell-mediated immunity, age-related changes, Down syndrome, 536  
intestinal glycosylation and, rat, 250  
maternal hyperinsulinemia and, fetal rat, 432  
postrest potentiation in atria, effects of postnatal maturation, 524  
short apneas, types and frequency, term and preterm infants, 344  
somatomedin C/insulin-like growth factor I and, in insulin resistance, 188  
transforming growth factor role, fetal development, sheep, 609
- Growth cartilage, achondrogenesis type II, extracellular matrix abnormalities, 324
- Growth hormone  
molecular variants of, children, 21  
role in stunted head growth, after cranial irradiation, 402
- Growth retardation, embolization-induced, fetal nutritional supplementation and, sheep, 55
- Growth sparing, biochemical determinants, during nutritional deprivation or enhancement, neonate, 599
- Haemophilus influenzae*  
antibiotic-resistant, plasmid-mediated, infant, 438  
type b, lipopolysaccharide effect on complement activation and polymorphonuclear leukocyte function, 659
- Head  
growth, after cranial irradiation, role of growth hormone, 402  
position, brain oxidative phosphorylation and, preterm and term neonates, 302
- Heart  
cardiac output, insulin effect, fetal lamb, 168  
disease, cyanotic, regional blood flow and oxygen delivery, neonatal lamb, 389  
immature, atrioventricular nodal function, dog, 616  
*in situ* morphology, fetal and newborn rat, 573  
lactate metabolism, isolated, perfused fetal, and neonatal, pig, 552  
left ventricular function, effect of bipyridine derivatives, neonatal lamb, 422  
myocardial contractile system, development, fetal rabbit, 201  
peroxisomal proliferation  
chlorpromazine and, mouse, 748  
high fat diet and, mouse, 748  
propafenone hydrochloride effects, neonatal canine, 50  
rate  
increase, effect on dorsal aortic flow, chick embryo, 442  
variability during respiratory pauses, puppies and dogs, 306
- Heart atria, postrest potentiation, effects of postnatal maturation on, rabbit, 524
- Heart ventricle, response to filling and arterial pressure and to *in utero* ventilation, fetal lamb, 621
- Helium, pulmonary clearance, effect of acute hemorrhagic hypotension, rabbit, 595
- Hemorrhage, germinal matrix vessels and, newborn puppy, 23
- Howland Award  
acceptance, 761  
presentation, 760
- Human milk  
antibodies, infant saliva, 399  
alpha-1-antitrypsin concentration, 268  
*Escherichia coli* adherence inhibited by, intestinal tract, guinea pig, 130  
future research, 493  
tuberculin immunity transferred via, 277  
vitamin K<sub>1</sub> content, stage of lactation and, 513
- Hyperglycemia, maternal, effect on acid base balance and lung liquid production, fetal lamb, 355
- Hyperinsulinemia  
in leprechaunism, infant, 286  
maternal, fetal growth limited by, rat, 432
- Hyperornithinemia-hyperammonemia-homocitrullinuria syndrome, creatine excretion, effect of citrulline, arginine, or ornithine supplement, 364
- Hypotension, acute hemorrhagic, effect on pulmonary clearance of helium in-

- stilled in colon, rabbit, 595  
 Hypoxemia  
   arousal from sleep during, lamb, 471  
   oxygen transport and metabolism during, lamb, 177  
 Hypoxia  
   alveolar, small pulmonary wedge pressure increased by, awake lamb, 679  
   cerebral arteries and, newborn lamb, 192  
 Immunity, humoral and cell-mediated, age-related changes, Down syndrome, 536  
 Immunization  
   bovine serum albumin, murine responses, 262  
   pertussis toxin, murine responses, 262  
 Immunoglobulin  
   effect on sepsis and meningitis, neonatal rat, 455  
   secretory component, after proximal enterectomy, 29  
 Indomethacin, *in utero*, effects on pulmonary vasculature, newborn guinea pig, 693  
 Infant  
   see also Neonate  
   airway occlusion, genioglossus response, apneic *versus* nonapneic infants, 683  
   bacterial meningitis, plasmid-mediated resistance, 438  
   bronchiolitis, salbutamol effect, 83  
   fat-free mass and total body water, estimated from total body electrical conductivity measurements, 417  
   intracranial arterial blood flow velocities, early postnatal changes, 461  
   leprechaunism, *in vitro* insulin resistance, 286  
   leucine, oxidation, ontogenetic changes in rates of, fetus, 688  
   Leukocyte  
     polymorphonuclear  
       abnormalities, neonate, 375  
       effect of *Haemophilus influenzae* type b lipopolysaccharide on, 659  
   Leukotriene, putative synthesis inhibitor, fetal circulation and, lamb, 350  
   Lipid, infusion, lung vascular effects, awake lamb, 714  
   Lipopolysaccharide, *Haemophilus influenzae* type b, effect on complement activation and polymorphonuclear leukocyte function, 659  
   Lipoprotein lipase, inhibition, in steroid responsive nephrotic syndrome, 197  
   Lipoxygenase, effect on pulmonary function, group B streptococcal sepsis, piglet, 478  
 Liver  
   developing, cysteine and glutathione levels, rat, 605  
   peroxisomal proliferation  
     chlorpromazine and, mouse, 748  
     high fat diet and, mouse, 748  
 Lung  
   blood flow, leukotrienes and, fetal lamb, 350  
   chronic *Pseudomonas* infections, mouse, 698  
   development, neonatal protein deprivation and, rat, 45  
   elastin and collagen ontogenesis, fetal sheep, 335  
   fetal maturation, estradiol-17 $\beta$  effect, sheep, 145  
   function  
     group B streptococcal sepsis, piglet, 478  
     tachypnea of unknown cause, neonate, 581  
   lipid infusion, vascular effects, awake lamb, 714  
   liquid production, effect of maternal hyperglycemia, fetal lamb, 355  
   maturation, elastin and collagen related to, sheep fetus, 339  
   neonatal  
     effect of indomethacin *in utero*, guinea pig, 693  
     impaired pulmonary clearance of pneumococci, rat, 736  
   premature, betamethasone effect on pulmonary compliance, rabbit, 730  
   *Pseudomonas aeruginosa* infection, immunohistological evaluation, cystic fibrosis, 743  
   type II cells, temporal linkage of glycogen and phosphatidylcholine, rat, 79  
 Macromolecules  
   biochemical determinants of growth sparing and, during nutritional deprivation or enhancement, neonatal brain and heart, 599  
   intestinal absorption, during viral enteritis, mice, 72  
 Magnesium, role in calcium homeostasis, neonate, 319  
 Mannan, small intestine damage prevented by, rat fetus, 703  
 Mannitol, experimental meningitis treatment, *Haemophilus influenzae* type b, rabbit, 118  
 Maturation, postnatal, effects on postrest potentiation, rabbit atria, 524  
 Melatonin, photic and pharmacologic manipulation, calcemic responses, neonatal rat, 414  
 Membrane, fluidity, nonmuscle cells, Duchenne muscular dystrophy, 488  
 Meningitis  
   bacterial, plasmid-mediated resistance, infant, 438  
   *Escherichia coli*, immunoglobulin effect, neonatal rat, 455  
   *Haemophilus influenzae* type b, mannitol treatment, rabbit, 118  
 Metabolism, uterine, late pregnancy, pig, 587  
 Metabolite, utilization, fetuses from fed and starved rats, 6  
 Midpregnancy, serum growth-promoting activity, normal and hypotrophic fetuses, 39  
 Milk feed, composition, upper intestinal mucosa proliferation and, newborn guinea pig, 675  
 Milrinone, effect on myocardial mechanical function and cyclic adenosine monophosphate content, fetal rabbit, 282  
 Mitochondria, inhibition of function by margaosa oil, Reye's syndrome and, rat, 184  
 Molecule, new functions, presidential address, 755  
 Mother, tuberculin immunity, transfer to infant, 277  
 Mucin, tracheobronchial, biochemical properties, cystic fibrosis, 545  
 Mucosa, upper intestinal, milk feed composition and, newborn guinea pig, 675  
 Muscle, laryngeal, activity control, preterm infants, 87  
 Muscular dystrophy, Duchenne, membrane fluidity of nonmuscle cells, 488  
 Neonate  
   arteriolar resistance, effect of bipyridine derivatives on, lamb, 422  
   bone status, assessment by transmission ultrasonics, 541  
   brain, developmental changes and hypoxic sensitivity, lamb cerebral arteries, 192  
   calcium homeostasis, role of magnesium, 319

- cardiac output, intravenous catecholamine effect, unanesthetized hypoxemic lambs
- cerebral metabolism, effect of bilirubin and sulfixazole, piglet, 135
- cerebral vessels, quantitative analysis, dogs, 23
- cholesterol deprivation, small intestine alterations after, piglet, 330
- cyanotic heart disease, regional blood flow and oxygen delivery, lamb, 389
- growth sparing, biochemical determinants, during nutritional deprivation and enhancement, 599
- heart, propafenone hydrochloride effects, dog, 50
- heart and great vessels, *in situ* morphology, rat, 573
- hypoxemia, arousal from sleep during, lamb, 471
- impaired pulmonary clearance of pneumococci, rat, 736
- iron absorption in, lactoferrin and, 651
- lactate metabolism, pig heart, 552
- lecithin/sphingomyelin ratio determination, tracheal aspirates, 154
- neutrophil chemotaxis, betamethasone effect, 150
- polymorphonuclear leukocytes, biochemical, structural, and functional abnormalities, 375
- protein deprivation, lung development impaired by, rat, 45
- pulmonary vasculature, effect of indomethacin *in utero*, guinea pig, 693
- sepsis and meningitis, immunoglobulin effect, rat, 455
- serum melatonin manipulation, calcemic responses, rat, 414
- short apneas, types and frequency, developmental study, 344
- short chain fatty acid profile, fecal water analysis, colon, pig, 720
- tachypnea of unknown cause, lung function in, 581
- upper intestinal mucosa, milk feed composition and, guinea pig, 675
- ventilation pressure, effect on cortical subarachnoid cerebrospinal prostanoids, piglet, 647
- head position alteration, brain oxidative phosphorylation after, 302
- Nephrotic syndrome, steroid responsive, inhibition of lipoprotein lipase, 197
- Neutrophil
- Chediak-Higashi syndrome, normal-sized lysosomes in, 208
- chemotaxis, betamethasone effect, neonate, 150
- Nutrition
- deprivation, biochemical determinants of growth sparing during, neonate, 599
- enhancement, biochemical determinants of growth sparing during, neonate, 599
- intravenous supplementation, fetal, effect on growth retardation, sheep, 55
- Obesity, erythrocyte fluidity, changes studied, 141
- Ornithine, effect on creatine excretion, hyperornithinemia-hyperammonemia-homocitrullinuria syndrome, 364
- Ornithine decarboxylase, biochemical determinants of growth sparing and, during nutritional deprivation or enhancement, neonatal brain and heart, 599
- Oxygen
- delivery, cyanotic heart disease, neonatal lamb, 389
- delivery and consumption, during streptococcal group B sepsis, piglet, 509
- metabolism, hypoxemia effects, lamb, 177
- retinopathy induced by, effects of variable oxygenation during recovery phase, kitten, 297
- transport, hypoxemia effects, lamb, 177
- Oxygen free radical, asphyxia treatment, cerebral survival after, newborn sheep, 62
- Pancreas
- DNA and protein synthesis in, rats, 34
- insufficiency, detected by cholesteryl octanoate breath test, rat, 257
- Patent ductus arteriosus, additional volume loads and, premature lamb, 531
- Peptide
- atrial natriuretic, action in immature ovine kidney, 11
- cerebral prolamin, role of mannan in prevention of intestinal damage induced by, rat fetus, 703
- Pertussis toxin, immunization, anaphylactic reaction, mouse, 262
- Phagocytosis, nonopsonic, susceptibility of *Pseudomonas aeruginosa*, cystic fibrosis, 429
- Phosphatidylcholine, saturated, glycogen and, fetal lung type II cells, rat, 79
- Placenta, glucose utilization, effect of insulin, glucose, and ketone bodies, rat, 483
- Plasma,  $\alpha$ 1-protease inhibitors, fetal-specific forms, mice, 1
- Pneumococci, impaired pulmonary clearance, neonatal rat, 736
- Polyamines, biochemical determinants of growth sparing and, during nutritional deprivation or enhancement, neonatal brain and heart, 599
- Polypeptide, atrial natriuretic, ontogeny and characterization, fetal rat, 115
- Polysaccharide, antigens, impaired natural antibody response to, cystic fibrosis, 708
- Pregnancy, late, uterine metabolism during, pig, 587
- Prematurity
- docosahexaenoic and eicosapentaenoic acid uptake, related to intake and mode of administration, 292
- exogenous surfactant distribution, ventilation methods compared, lamb, 725
- fat absorption, improved by taurine supplementation of premature formula, 67
- laryngeal muscle activity, control of, 87
- patent ductus arteriosus, additional volume loads and, lamb, 531
- pulmonary compliance, betamethasone effect, rabbit, 730
- short apneas, types and frequency, 344
- vancomycin pharmacology, seriously ill infants, 360
- Pressure
- arterial
- response of fetal ventricles, lamb, 621
- small pulmonary wedge
- effect of alveolar hypoxia, awake lamb, 679
- Prolidase, monoclonal and polyclonal antibodies in, immunochemical studies, 627
- Propafenone hydrochloride, electrophysio-logic effects, neonatal heart, dog, 50
- Prostanoids, ventilation pressure effect, cortical subarachnoid cerebrospinal fluid, newborn pig, 647
- Protease inhibitor,  $\alpha$ 1-, fetal-specific forms, mouse plasma, 1
- Protein
- calcium-binding, variations in dietary calcium and, 518
- enzyme, absence, in tyrosinemia, 394
- neonatal deficiency, lung development impaired by, rat, 45
- synthesis
- DNA and, developing rat pancreas, 34
- ontogenetic changes in rates of, fetus, 688
- transport, during rotavirus diarrhea, mice, 72
- Proteoglycan, cartilage, structure and abundance, early development of human fetus, 409
- Pseudomonas aeruginosa*
- chronic pulmonary infection, mouse, 698
- colonization, correlation of serum opsonic activity with, cystic fibrosis, 383
- mucoid, phagocytosis resistance of, 429
- pulmonary infection, immunohistological evaluation, cystic fibrosis, 743
- Pseudomonas cepacia*, chronic pulmonary infection, mouse, 698
- Puberty, corticotropin-releasing factor, adrenocorticotropin, cortisol, and dehydroepiandrosterone response to, 41
- Pyruvate dehydrogenase, first component, systemic deficiency, 312
- Respiration
- frequency and variability, sudden infant death syndrome victims, 158
- pauses during, heart rate variability during, puppies and dogs, 306
- Retinopathy, oxygen-induced, kitten, 297
- Reye's syndrome, pathogenesis, mitochondrial toxicity of margosa oil, rat, 184
- Rotavirus, diarrhea, protein transport during, mice, 72
- Salbutamol, respiratory mechanics and, infants with bronchiolitis, 83
- Saliva, local antibodies to  $\alpha$ -casein and  $\beta$ -lactoglobulin in, infants, 399
- Sepsis
- Escherichia coli*, immunoglobulin effect, neonatal rat, 455
- group B streptococcal
- oxygen delivery, consumption, and metabolic acidosis during, piglet, 509
- pulmonary function, effect of cyclooxygenase and lipoxygenase products, piglet, 478
- Septicemia, meningococcal, C3 converting factor and, case report, 123
- Serum, growth-promoting activity, normal and hypotrophic fetuses, 39
- Skin, fibroblasts, catabolism of branched-chain L-amino acids in, 591
- Sleep, arousal from, during rapidly developing hypoxemia, lamb, 471
- Small intestine
- alterations, after cholesterol deprivation, piglet, 330
- cellular adaptation, after proximal enterectomy, rats, 29
- fetal, *in vitro* damage prevented by mannan and other sugars, rat, 703
- glycosylation, developmental changes, rat, 250

- Society for Pediatric Research, presidential address, 755
- Somatomedin, immunocytochemistry, human fetus, 245
- Streptococcus  
  group B  
    sepsis, oxygen delivery, consumption, and metabolic acidosis during, piglet, 509  
    sepsis, pulmonary function, piglet, 478
- Sudden infant death syndrome, respiratory frequency and variability, in high risk victims, 158
- Sulfisoxazole, effect on cerebral metabolism, newborn piglet, 135
- Surfactant, exogenous, distribution, ventilation methods compared, premature lamb, 725
- Sweat, hyposcretion, cystic fibrosis heterozygotes, 271
- Tachypnea, unknown cause, lung function in, neonate, 581
- Taurine  
  supplementation of premature formula, fat absorption improved by, preterm infants, 67  
  transport, maturational differences, rat kidney, 163
- Transforming growth factor, possible role in ovine fetal development, 609
- Tuberculin, transfer of immunity, mother to infant, 277
- Tyrosinemia, type I, absence of enzyme protein in, 394
- Ultrasonography, transmission, bone status assessment, neonate, 541
- Uterus, metabolism, late pregnancy, pig, 587
- Vancomycin, pharmacology, seriously ill pre-mature infants, 360
- Vasodilation, renal  $\beta$ -adrenoceptor-mediated, ontogeny, endogenous catecholamines compared, sheep, 465
- Ventilation  
  *in utero*, response of fetal ventricles, lamb, 621  
  prematurity, exogenous surfactant distribution, comparison of methods, lamb, 725  
  pressure, effect on cortical subarachnoid cerebrospinal prostanooids, newborn pigs, 647
- Vitamin E, disposition in the eye, cats, 16
- Vitamin K<sub>1</sub>  
  human milk content, stage of lactation and, 513  
  sister chromatid exchange induced by, human leukocytes and fetal sheep cells, 405
