

Subject Index to Volume 27

- Acetylcholine, vasodilator action, endothelium-derived relaxing factor as mediator of, guinea pig, 128
- N-Acetylglutamate, hepatic and intestinal tissue content, normal and fasted mice, 408
- Acidemia
- glutamic, type II, phenotype heterogeneity, 311
 - methylmalonic, urinary metabolite excretion during fasting in children with, 413
 - propionic, urinary metabolite excretion during fasting in children with, 413
- Adolescents, energy expenditure, obese and nonobese subjects, 198
- Adrenal gland, calcium homeostasis and, rat, 571
- Age, antibody to erythrogenic toxin related to, Kawasaki disease, 11
- Airway, pressure, amplitude minimization, during high frequency oscillatory ventilation, rabbit, 64
- Allopurinol, hypoxic-ischemic brain injury reduced by, newborn rat, 332
- American Pediatric Society
- centennial history, S4
 - presidential address, S1
- Amrinone, biphasic effect, myocardium, neonatal rabbit, 144
- Aorta, vascular relaxation, ontogeny of sodium nitroprusside and atrial natriuretic factor responses, guinea pig, 392
- Apnea, idiopathic, periodic breathing and, premature infant, 118
- Asphyxia, cerebral hemodynamics after, blood glucose concentration effect, neonatal lamb, 454
- Atrial natriuretic factor
- ontogeny of relaxation response, comparison, atrial natriuretic factor, guinea pig aorta, 392
 - plasma concentrations, correlation with patent ductus arteriosus shunting, preterm infants with respiratory distress syndrome, 137
 - water homeostasis and, bronchopulmonary dysplasia, 260
- Atrial natriuretic peptide
- effect on embryonic hemodynamics, stage 21 chick embryo, 557
 - exogenous, pulmonary vascular effects, sheep fetus, 140
 - role in blood volume expansion, weanling rat, 396
- Autonomic nervous system, heart rate variation regulated by, neonatal lamb, 383
- Bacteria, carbohydrate fermentation patterns, formula-fed and breast-fed infants, 165
- Baroreflex, heart rate control, development, piglet, 148
- Barotrauma, effect on pulmonary clearance of ^{99m}technetium diethylenetriamine pentaacetate, lamb, 70
- Bicarbonate, elevated plasma concentration, effect on segmental nephron HCO₃ reabsorption, newborn dog, 604
- Biliary atresia, extrahepatic, 25-hydroxyvitamin D absorption, 26
- Bilirubin
- as growth inhibitor, chicken embryo *in ovo*, 617
 - blood-brain barrier permeability, injection and perfusion techniques, 436
- Biology, developmental, as preventive medicine for neonatology, S21
- Blood-brain barrier, permeability, injected and perfused bilirubin, rat, 436
- Blood cell, peripheral mononuclear, polymerase activity, Kawasaki disease, 109
- Blood flow
- cerebral
 - CO₂-related changes, ventilated preterm neonates, 445
 - perinatal hypoxic-ischemic brain damage, 450
 - ventilatory response to hypoxia related to, newborn piglet, 327
- embryonic, atrial natriuretic peptide effect, chick, 557
 - pulmonary
 - atrial natriuretic peptide effect, fetal sheep, 140
 - changes, during birth-related events, fetal sheep, 372
 - pulmonary arterial, role, fetal lung growth, sheep, 122
 - scalp, measurement techniques, lamb, 442
- Blood gas, exchange, during high frequency oscillatory ventilation, rabbit, 64
- Blood volume, expansion, atrial natriuretic peptide and, weanling rat, 396
- Body water, measurement, bioelectrical impedance method, normal and malnourished children, 98
- Bone marrow, new human tumorigenic neuroblastoma cell line from, 1
- Bradykinin, vasodilator action, endothelium-derived relaxing factor as mediator of, guinea pig, 128
- Brain
- development, docosahexaenoic acid role, chick, 89
 - hypoxic-ischemic damage
 - delayed seizures with, fetal sheep, 561
 - experimental biology of, 317
 - glucose protective effect, neonatal rat, 186
 - perinatal, cerebral blood flow and edema in, 450
 - reduction by allopurinol, newborn rat, 332
- injury, prevention, premature infant, S28
 - noradrenergic pathways, undernutrition and overnutrition effect, rat, 191
 - phenylalanine, proton nuclear magnetic resonance observation, rabbit, 566
- Brain stem, bilateral lesions, growth stunting and, rat, 181
- Breast milk
- carbohydrate fermentation, feces comparison, formula-fed infants, 165
 - glutathione peroxidase activity, impact of gestational length, 32
 - lactoferrin in stool and urine of infants fed with, 252
 - selenium concentration, impact of gestational length, 32
- Breathing
- pattern, analysis, sudden infant death syndrome susceptibility, 113
 - periodic, idiopathic apnea of prematurity and, 118
- Bronchiolitis, water, electrolyte, and endocrine homeostasis in infants with, 204
- Bronchopulmonary dysplasia
- early stages, changes in vasopressin, atrial natriuretic factor and water homeostasis, 260
 - polymorphonuclear leukocyte superoxide anion release, retinol inhibition, 574
- Bronze baby syndrome, animal model for, 22
- Calcium, homeostasis, pineal and adrenal effects, rat, 571
- Carbamyl phosphate synthetase, deficiency, N-acetylglutamate content in human livers with, 408
- Carbohydrate, bacterial fermentation, feces, formula-fed and breast-fed infants, 165
- Carbon dioxide
- effect on cerebral blood flow, mechanically ventilated preterm neonates, 445
 - pressure, transcutaneous, scalp blood flow measured by, 442
- Cardiomyopathy, hypertrophic, WKY/NCrj rat, 483
- Carnitine palmitoyltransferase I and II, defects, immunoquantitative analysis, 497
- Cataractogenesis, sugar-induced, STZ-diabetic rat, 293
- Cholestasis, chronic, 25-hydroxyvitamin D absorption in, 26
- Chondrodysplasia punctata, rhizomelic, aberrant localization of peroxisomal thiolase, 304
- Circulation: *see* Blood flow
- Collagen, neonatal platelet response to, 337
- Colony stimulating factor, recombinant human granulocyte, group B streptococcal sepsis treatment, neonatal rat, 612
- Complement, eighth component, detection of heterozygotes for β -subunit deficiency, 234
- Cooling, evaporative, as adjunct to ice bag use, hyperthermia, primate model, 264
- Copper, hepatic metabolism, Menkes' kinky hair syndrome, mouse model, 492
- Copper porphyrin, role in bronze baby syndrome, animal model, 22
- Cystic fibrosis, *Pseudomonas aeruginosa*, serum immunoglobulin G antibodies to, 508
- Dazmeglrel, pretreatment, tumor necrosis factor-induced pulmonary hypertension, 466
- Dehydration, diarrheal, treatment, S62
- Dehydrogenase, multiple deficiency, lipoic acid effect, infant, 75

- Deoxyribonucleic acid, thymidine incorporation, lactoferrin stimulation, rat crypt enterocytes, 525
- Diabetes, proteoglycan metabolism, growth plate, rat, 41
- Diabetes mellitus, nonosmotic cataracts, sorbitol-taurine relationship, rat, 293
- Diarrhea
acute, trace mineral excretion during, 170
dehydration treatment, American pediatricians, S62
- Digoxin, intraamniotic, fetal uptake, sheep, 282
- Docosahexaenoic acid, dietary, effect on brain and retina development, chick, 89
- Doppler, laser flowmetry, scalp blood flow measured by, lamb, 442
- Edema, cerebral, perinatal hypoxic-ischemic brain damage, 450
- Electrocorticogram, maturational changes, spectral edge frequency as measure of, fetal lamb, 289
- Electrolyte, homeostasis, infants with broncholitis, 204
- Embryo
bilirubin and heme as growth inhibitors of, chicken embryos *in ovo*, 617
hemodynamics, atrial natriuretic peptide effect, chick, 557
- Encephalopathy: *see* Brain
- Energy expenditure, obese and nonobese adolescents, 198
- Enzyme, antioxidant, prenatal development, rat lung, kidney, heart, 472
- Epinephrine, reabsorptive response to, fetal lung liquid, sheep, 588
- Erythropoietin, effect on granulocytopoiesis, weanling rat, 583
- Escherichia coli*, antibody, maternofetal transfer, premature neonate, 365
- Eye, nonosmotic cataracts, STZ-diabetic rat, 293
- Fatty acid, dietary n-3, nervous tissue development, chick, 89
- Fetus
antioxidant enzyme development, rat lung, kidney, heart, 472
bilirubin and heme exposure, effect on growth, chicken embryo, 617
circulation, acute uterine ischemia effect, sheep, 552
development, xanthine oxidase during, 286
hypoxia, met-enkephalin peptide and catecholamine levels, sheep, 52
hypoxic-ischemic encephalopathy, delayed seizures with, sheep, 561
insulin-like growth factor I concentrations, effect of maternal starvation, sheep, 401
intraamniotic digoxin uptake, sheep, 282
intrauterine growth retardation
fetal cardiac blood flow and, 379
hepatic energy and redox states, rat, 56
lung
blood flow, atrial natriuretic peptide effect, sheep, 140
growth, role of pulmonary arterial flow, sheep, 122
lactate metabolism, late gestation alterations, sheep, 274
liquid, reabsorption, triiodothyronine and hydrocortisone effect, sheep, 588
placental transfer of magnesium, rat, 622
protein kinase-C-dependent phosphorylation, rat liver, 599
pulmonary vascular resistance, birth-related changes, sheep, 372
T and B lymphocyte populations, distribution, intestine, 239
- Follicle-stimulating hormone, pulsatile secretion, immunofluorometric assay, prepubertal and early pubertal boys, 215
- Galactose metabolism, ovarian tissue, 117
- Galanin, growth hormone secretion stimulated by, somatostatin involvement, 405
- Gene, analysis, constitutionally variant stature, 488
- Genetic diseases, treatment, case reports, S10
- Genetics
historical events, S17
molecular, symposium introduction, S8
- Gestation, length, impact on human milk selenium concentration and glutathione peroxidase activity, 32
- Glucose
blood concentration, postasphyxia cerebral hemodynamics, neonatal lamb, 454
protective effect, hypoxic brain injury, neonatal rat, 186
- Glutamine, transport, maturational changes, rat jejunal brush border membrane vesicles, 519
- Glutathione peroxidase, activity, human milk, gestational length and, 32
- Granulocytopoiesis, erythropoietin effect, weanling rat, 583
- Growth and development
bilirubin and heme effect, chicken embryo, 617
effect of bilateral brain stem lesion, rat, 181
electrocortical activity maturation, spectral edge frequency as measure of, fetal lamb, 289
glutamine transport, maturational changes, jejunal brush border membrane, 519
heart rate, arterial baroreflex control, piglet, 148
intestinal maturation, insulin effect, suckling and weanling rat, 161
lung
role of pulmonary arterial flow, fetal sheep, 122
surfactant palmitic acid clearance, developing and adult rabbit, 268
myocardial diastolic ventricular interaction, pericardial effects, preterm and neonatal lamb, 547
xanthine oxidase activity and substrate affinity, liver, brain, myocardium, intestine, fetal lamb, 286
- Growth hormone
galanin-induced secretion, endogenous somatostatin involvement, 405
provocative testing, response prediction by insulin-like growth factor I levels, 45
- Growth plate, proteoglycan and cell kinetics, normal, diabetic, and malnourished rats, 41
- Growth retardation
intrauterine
fetal hepatic energy and redox states, rat, 56
role of blood flow velocity waveforms, 379
- Guanidino, compound analysis, role in hyperargininemia diagnosis, 297
- Haemophilus influenzae*, type b, functional activity of antibody to, 358
- Heart
antioxidant enzyme development, fetal rat, 472
force and oxygen consumption, immature rabbit, 476
ventricle interaction, pericardial effect, preterm and neonatal lamb, 547
- Heart rate
arterial baroreflex control, developmental course, piglet, 148
variation, regulation by autonomic nervous system, neonatal lamb, 383
- Hematopoiesis, regulation, special article, 423
- Heme, as growth inhibitor, chicken embryo *in ovo*, 617
- Hemorrhage, maternal, fetal blood flow and, sheep, 552
- Heparin, clinical doses, oxygen-induced retinopathy, kitten, 580
- Human milk: *see* Breast milk
- Hydrocortisone, synergistic action with triiodothyronine, reabsorption of fetal lung liquid, sheep, 588
- 25-Hydroxyvitamin D, absorption, chronic childhood cholestasis, 26
- Hyperargininemia, diagnosis, role of guanidino compound analysis, 296
- Hyperbicarbonemia, euvoletic and hypervolemic, effect on HCO₃ reabsorption, newborn dog, 604
- Hypertension
pulmonary
group B *Streptococcus*-induced, piglet, 344
methylprednisolone effect, neonatal lamb, 133
neonatal, dazmegrel pretreatment, 466
- Hyperthermia, evaporative cooling as adjunct to ice bag, primate model, 264
- Hyperuricemia, in partial hypoxanthine-guanine phosphoribosyltransferase deficiency, carrier detection, 417
- Hypocalcemia, during phototherapy, pineal and adrenal effects, rat, 571
- Hypogonadism, hypogonadotropic, diagnostic methods, 211
- Hyponatremia, cerebral edema during, taurine role, cat, 85
- Hypoxanthine-guanine phosphoribosyltransferase, partial deficiency, carrier detection, 417
- Hypoxia
brain blood flow and ventilatory response to, neonatal piglet, 327
effect on met-enkephalin peptide and catecholamine levels, fetal sheep, 52
perinatal brain damage, cerebral blood flow and edema in, 450
pulmonary vasoconstriction, methylprednisolone effect, neonatal lamb, 133
- Imaging, proton nuclear magnetic resonance, phenylalanine, rabbit brain, 566
- Immunization, pertussis, metabolic, hematologic, and immunologic functions related to, 353
- Immunofluorometry, pulsatile secretion of luteinizing hormone and follicle-stimulating hormone assayed by, prepubertal and early pubertal boys, 215
- Immunoglobulin G
serum antibodies, *Pseudomonas aeruginosa*, cystic fibrosis, 508
transplacentally acquired antibody, premature neonates, 365

- Immunoglobulin G2, subnormal serum concentrations, healthy children with, 16
- Infant: *see also* Neonate
 bronchiolitis, clinical management, 204
 human milk fed, lactoferrin in stool and urine of, 252
 magnesium absorption and metabolism, measurement, isotopic techniques, 36
 medical research, analysis of rejected protocols, 432
 multiple dehydrogenase deficiency, lipoic acid effect, 75
 preterm
 extracellular volume estimation by sucrose dilution, 256
 left ventricular output, patent ductus arteriosus, 278
 protein-energy malnutrition, refeeding impact after, rabbit, 245
- Infant formula
 carbohydrate fermentation, feces comparison, breast-fed infants, 165
 lactoferrin-supplemented, iron retention from, infant rhesus monkey, 176
- Infection, resistance, therapeutic manipulation, S44
- Infectious disease
 symposium introduction, S38
 100 years perspective, S49
- Insulin, effect on small intestine, suckling and weanling rat, 161
- Insulin-like growth factor-I
 gene analysis, subjects with constitutionally variant stature, 488
 plasma concentrations, effect of maternal starvation, ovine fetus, 401
 role in predicting growth hormone sufficiency, 45
- Interferon- α , deficient herpes simplex virus-induced production, blood leukocytes, preterm and term neonates, 7
- Interleukin-6, production by neonatal leukocytes, 227
- Intestine, T and B lymphocyte populations, fetal and postnatal tissue samples, 239
- Iron, absorption, lactoferrin-supplemented formula, infant rhesus monkey, 176
- Ischemia
 perinatal brain damage, cerebral blood flow and edema in, 450
 uterine, acute, effect on fetal blood flow, sheep, 552
- Isotope, stable, magnesium metabolism studied by, full-term infants, 36
- Jejunum, brush border membrane, glutamine transport, maturational changes, rat, 519
- Kawasaki disease
 erythrogenic toxin mitogenicity, age distribution, 11
 polymerase activity, cultured peripheral blood mononuclear cells, 109
- Kidney
 antioxidant enzyme development, fetal rat, 472
 hydronephrotic, prostanoid role, 103
- Lactate, pulmonary metabolism, late gestation alterations, sheep, 274
- Lactoferrin, molecular forms, stool and urine of human milk-fed infants, 252
- Learning deficit, after bilateral brain stem lesions, rat, 181
- Leukocyte
 interferon- α production by, preterm and term neonates, 7
 neonatal, interleukin-6 production by, 227
 polymorphonuclear, activation, retinol suppression, 574
- Life expectancy, child survival revolution, S56
- Lipoic acid, effect in multiple dehydrogenase deficiency, infant, 75
- Liver
 copper metabolism, mouse model for Menkes' kinky hair syndrome, 492
 protein kinase-C phosphorylation, fetal rat, 599
- Lung
 antioxidant enzyme development, fetal rat, 472
 circulation, changes, during birth-related events, fetal sheep, 372
 clearance of surfactant-associated palmitic acid, developing and adult rabbit, 268
 fetal development, role of pulmonary arterial flow, sheep, 122
 high-frequency jet ventilation effect, newborn piglet, 460
 lactate metabolism, late gestation alterations, fetal sheep, 274
 surfactant subfraction effect, preterm rabbit, 592
 target cells, group B *Streptococcus* interaction, piglet, 344
^{99m}technetium diethylenetriamine pentaacetate clearance, mechanical ventilation and barotrauma effect, lamb, 70
- Lung liquid, reabsorption, synergistic action of triiodothyronine and hydrocortisone, fetal sheep, 588
- Luteinizing hormone
 pulsatile secretion, immunofluorometric assay, prepubertal and early pubertal boys, 215
 serum level measurement, boys with delayed puberty, 211
- Lymphocyte, distribution, fetal and postnatal intestine, 239
- Magnesium
 maternofetal transfer, perfused rat placenta, 622
 metabolism, isotopic techniques, full-term infants, 36
- Malnutrition
 protein-energy, refeeding impact after, infant rabbit, 245
 proteoglycan metabolism, growth plate, rat, 41
 rotavirus infection with, effect on gut permeability, mice, 153
 total body water measurement, bioelectrical impedance method, 98
- Menkes' kinky hair syndrome, hepatic copper metabolism, mouse model, 492
- Methylprednisolone, effect on hypoxic pulmonary vasoconstriction, neonatal late-gestation lamb, 133
- MHC class II, expression, fetal and postnatal intestine, 239
- Mineral, excretion, during acute diarrhea treated with oral rehydration, 170
- Mortality, child survival revolution, S56
- Myocardium, tension development, amrinone effect, neonatal rabbit, 144
- Neonate
 bronze baby syndrome, animal model for, 22
 diastolic ventricular interaction, pericardial effects, lamb, 547
 endothelium-derived relaxing factor, presence, pulmonary and systemic arteries, guinea pig, 128
 granulocytopenia, erythropoietin effect, weanling rat, 583
 group B streptococcal sepsis, recombinant human granulocyte colony stimulating factor treatment, rat, 612
 heart rate variation, regulation by autonomic nervous system, lamb, 383
 high-frequency jet ventilation, early pulmonary changes with, piglet, 460
 hypoxic-ischemic brain injury, glucose protective effect, rat, 186
 hypoxic pulmonary vasoconstriction, methylprednisolone effect, late-gestation lamb, 133
- leukocyte
 interferon- α response, term and preterm infants, 7
 interleukin-6 production by, 227
 medical progress, S34
 myocardium, amrinone effect on tension development, rabbit, 144
 nutrition, effect on noradrenergic pathways in brain regions, rat, 191
 platelet, deficient collagen-induced activation, 337
- Pneumococcus, deficiencies in opsonic defense to, 514
- postasphyxia cerebral hemodynamics, blood glucose concentration effect, lamb, 454
- premature, placental transfer of *Escherichia coli* antibody, 365
- preventive medicine, role of developmental biology, S21
- pulmonary hypertension, dazmegrel pretreatment, 466
- red blood cell deformability, rat, 220
- segmental nephron HCO₃ reabsorption, hyperbicarbonemia effect, dog, 604
- symposium introduction, S20
- ventilated preterm, carbon dioxide-related changes in cerebral blood flow, 445
- ventilatory response to hypoxia, cerebral blood flow and, piglet, 327
- Neuroblastoma, new highly tumorigenic human cell line, undetectable N-myc oncogene expression, 1
- N-myc oncogene, undetectable expression, new tumorigenic neuroblastoma human cell line with, 1
- Nutrition
 docosahexaenoic acid role, brain and retina development, chick, 89
 noradrenergic development and, neonatal rat, 191
 surveillance, total body water measurement by bioelectrical impedance, 98
- Obesity, energy expenditure and, adolescent subjects, 198
- Ornithine transcarbamylase, deficiency, N-acetylglutamate content in human livers with, 408
- Osmoregulation, taurine role, during acute hyponatremia, cat, 85
- Ovalbumin, intestinal absorption, malnourished and rotavirus infected mice, 153
- Ovary, galactose metabolism, 117
- Oxygen
 consumption, force and, immature rabbit heart, 476
 pressure, transcutaneous, scalp blood flow measured by, 442
- Palmitic acid, surfactant-associated, clearance, developing and adult rabbit lung, 268

- Patent ductus arteriosus
shunting, correlation with plasma atrial natriuretic factor concentration, preterm infants with respiratory distress syndrome, 137
stroke volume and left ventricular output, preterm infants, 278
- Peptide, met-enkephalin, hypoxia effect, fetal sheep, 52
- Pericardium, effect on ventricular coupling, preterm and neonatal lamb, 547
- Peroxisome, aberrant localization of thiolase, Zellweger syndrome and rhizomelic chondrodysplasia punctata, 304
- Pertussis, immunization, metabolic, hematologic, and immunologic functions related to, 353
- Phenotype, heterogeneity, glutaric acidemia type II, 311
- Phenylalanine, proton nuclear magnetic resonance observation, rabbit brain, 566
- 3-Phenylpropionic acid, dehydrogenation, enzymatic basis, 501
- Phototherapy, hypocalcemia during, pineal and adrenal effects, rat, 571
- Pineal gland, calcium homeostasis and, rat, 571
- Placenta
in vitro perfused, taurine transport in, 80
maternofetal transfer of magnesium, rat, 622
- Platelet, neonatal, impaired secretion response, 337
- Pneumococcus, opsonic defense deficiencies, newborn with adequate complement levels, 514
- Polymerase, characterization, cultured blood cells, Kawasaki disease, 109
- Pregnancy, acute uterine ischemia, effect on fetal circulation, sheep, 552
- Prematurity
brain injury prevention, S28
cerebral blood flow, carbon-dioxide related changes, 445
idiopathic apnea, periodic breathing and, 118
lung function, surfactant subfraction effect, rabbit, 592
respiratory distress syndrome, correlation, patent ductus arteriosus shunting with plasma atrial natriuretic factor concentration, 137
retinopathy of, heparin effect, kitten, 580
- Primitive culture, paradoxes of aspiration for and of children, S59
- Propionate, metabolism disorder, urinary metabolite excretion during fasting in children with, 413
