

Subject Index to Volume 30

- Acidemia, lactic, congenital, unstable pyruvate dehydrogenase protein in, 11
Acidosis, metabolic, benign variant of pyruvate carboxylase deficiency, 1
Aciduria
 ethylmalonic/adipic, glycine and carnitine supplementation effect, 216
 glutaric type II, prenatal diagnosis and neonatal monitoring, 439
 3-hydroxyisobutyric
 disorder of valine metabolism, 322
 rat liver, 5
 methylmalonic
 ATP levels during propionate and methylmalonate loading, rat liver, 5
 enzymologic studies, 560
 octenylsuccinic, related to protein-hydrolysate formula containing modified cornstarch, 564
 organic, neonatal screening method, 315
Acute phase response, developmental regulation, hamster, 444
Adenosine triphosphate, effect of propionate and methylmalonate loading, rat liver, 5
Adenylate cyclase, β -adrenergic regulation, ontogeny, intrapulmonary arteries, fetal and postnatal lamb, 610
Adipocyte, volume, determining factors, preweaning infant baboon, 534
Age: *see also* Gestational age
 glucose-modulated cerebral agonal glycolytic rates and, piglet, 579
 postictal increase in benzodiazepine receptors and, developing and adult rat, 100
Airway, developmental changes, preterm and full-term lambs, 170
Alloisoleucine, loading studies, maple syrup urine disease, 430
American Pediatric Society, 1991 Presidential Address, 299
Amino acids, excitatory, efflux, during focal hypoxic-ischemic injury, perinatal rat brain, 587
 γ -Aminobutyric acid, receptor, benzodiazepine binding sites and, developing rat, 100
Amniotic fluid, surfactant proteins A and B, fetal lung maturity and, 597
Amrinone, effect on thrombin-induced PDGF-like protein secretion, 351
Anemia, congenital hypoplastic, mitochondrial DNA deletion and, 327
Angiotensinogen
 gene regulation, fetal and pregnant rat liver, 252
 negative gene regulation, fetal sheep liver, 256
Apolipoprotein, circulating levels, marker for inherited dyslipidemia, 544
Arachidonic acid, embryonic uptake, effect of maternal diabetes, rat, 150
Atrial natriuretic factor, receptors, ontogeny, rabbit renal glomeruli, 45
Benzodiazepine, central binding sites, autoradiographic changes after seizures, developing rat, 100
Bilirubin
 effect on brain energy metabolism, after blood-brain barrier disruption, rat, 473
 -induced neurotoxicity, visual evoked potential role, jaundiced rat, 469
Birth stress, plasma endothelin-1 concentrations, fetal blood, 244
Blood-brain barrier, osmotic opening, bilirubin-induced changes after, rat, 473
Blood flow
 cerebral
 regulation, prostaglandin role, piglet, 106
 restoration of autoregulation, postictal piglet, 294
 velocity wave forms, fetal ductus arteriosus, normal pregnancy, 487
Blood volume, stress, hemodynamic response, late pregnant and nonpregnant rat, 479
Body composition, tobutamide effect, nondiabetic children with cystic fibrosis, 309
Body temperature, body warming effect, hypoxic newborn cats and dogs, 165
Brain
 early metabolic development, proton magnetic resonance spectroscopy role, 574
 metabolism, bilirubin-induced changes, rat, 473
Breath ethane, biomarker of vitamin E status, 396
Breathing
 mechanics of, idiopathic respiratory distress syndrome, very low birth weight infants, 496
 ventilatory response to CO₂, chemoreceptors, young piglet, 491
Calcium
 current measurements
 cardiac myocytes, neonatal rabbit, 83
 neonatal and adult cardiac myocytes, rabbit, 89
cAMP, receptor-mediated production, adult and infant ferret tracheal epithelium, 75
Carbon dioxide
 production, body warming effect, hypoxic newborn cats and dogs, 165
 ventilatory response, chemoreceptor role, neonatal piglet, 491
Cardiac hypertrophy, hereditary transmission, WKY/NCrj rats, 227
Cardiac output, after neural crest ablation, chick embryo, 509
Cardiogenesis, hemodynamic changes and compensatory mechanisms, after neural crest ablation, chick embryo, 509
Cardiomyocyte, sympathetic innervation, contractile response, hypertensive rat, 207
Carnitine, oral supplementation, ethylmalonic/adipic aciduria, 216
Carotid artery, blood flow acceleration, myocardial contractility and, neonatal lamb, 375
Catecholamine, maternal and fetal, acute hypercapnia effect, sheep, 368
Cerebral blood flow: *see* Blood flow
Chemoreceptor, contribution, ventilatory response to CO₂, neonatal piglet, 491
Chromosome, aberrations, after vitamin K prophylaxis, 550
Cirrhosis, biliary, liver metabolic zonation in, 286
Colony stimulating factor, granulocyte-macrophage, regulation, newborn *versus* adult, 362
Complement receptor type 3, phagocytosis of type III group B streptococcus and, murine macrophages, 118
Copper, distribution, endotoxin-treated neonatal mice, 141
Cord blood: *see* Umbilical cord
Cornstarch, protein-hydrolysate formula containing, octenylsuccinic aciduria associated with, 564
Corticosteroid, effect on antioxidant enzyme activity, ventilated immature lamb lung, 518
C-Reactive protein, expression, developmental regulation, hamster, 444
Cyclic GMP, response, ontogeny, rabbit renal glomeruli, 45
Cystic fibrosis
 mutations, association between haplotypes and, Swiss families, 304
 tobutamide effect on nondiabetic children with, 309
Deoxyadenosylcobalamin, clinical trial, methylmalonic aciduria, 560
Dexamethasone, vitamin K-dependent carboxylase stimulated by, neonatal rats and fetal hepatocytes, 281
Diabetes
 maternal, embryonic lipid uptake and, rat, 150
 mitochondrial DNA deletion and, 327
 placental lipase activity and, rat and human, 541
Diaphragm, electromyogram spectral analysis, end-expiratory lung volume status and, piglet, 606
Diarrhea, rotavirus, macromolecular absorption, sugar permeability and, 290
DNA, mitochondrial deletion, multisystem disease with, 327
Drug, nonsteroidal inflammatory, different effects, newborn piglet, 106
Ductus arteriosus, flow velocity wave forms, human fetus, normal pregnancy, 487
Dyslipidemia, inherited, early detection, 544
Electromyogram, diaphragmatic power-spectral analysis, end-expiratory lung volume status and, piglet, 606
Electron transfer flavoprotein, deficiency, prenatal diagnosis and neonatal monitoring, 439
Embryo
 cardiovascular function, environmental hyperthermia effect, rat, 505

- lipid uptake, effect of maternal diabetes, rat, 150
- neural crest ablation, early cardiogenesis after, chick, 509
- Endothelial cell, thrombin-induced PDGF-like protein secretion, amrinone effect, 351
- Endothelin-1, plasma immunoreactive concentration, fetal asphyxia and, 244
- Endotoxin, early exposure, effect on organ growth and zinc and copper distribution, neonatal mice, 141
- Enteritis, rotavirus, macromolecular absorption, sugar permeability and, 290
- Enzyme
- antioxidant
 - corticosteroid and TRH effect, ventilated immature lamb lung, 518
 - TRH/dexamethasone effect, neonatal rat lung, 522
 - Eosinophil, Mac-1 expression, neonate, 355
 - Epidermal growth factor, intestinal transport and, suckling rabbit, 342
 - Epithelium, cAMP production, receptor-mediated, ferret trachea, 75
 - Exercise, static, cardiovascular and respiratory response, neonatal kitten, 95
 - Fatty acid, metabolism, long-chain acyl-CoA dehydrogenase deficiency, 211
 - Feeding, leucine kinetics during, normal newborns, 23
- Fetus
- acute hypercapnia, effect on vasopressin and catecholamine release, sheep, 368
 - adenylate cyclase regulation, intrapulmonary arteries, lamb, 610
 - angiotensinogen gene regulation, rat liver, 252
 - asphyxia, plasma immunoreactive endothelin-1 concentrations and, 244
 - breathing movements
 - effects of lung distension, oxygenation, and gestational age, sheep, 193
 - effects of μ , opiate receptor blockade, lamb, 202
 - ductus arteriosus, flow velocity wave forms, 487
 - glucocorticoid regulation of angiotensinogen gene expression, sheep liver, 256
 - glucose supplementation, leucine metabolism during, sheep, 423
 - glutaric aciduria type II, prenatal diagnosis and neonatal monitoring, 439
 - lung
 - corticosteroids, TRH, and antioxidant enzymes, lamb, 518
 - maturity, amniotic surfactant proteins and, 597
 - metabolism, effect of birth-related events, sheep, 158
 - ontogeny of TRH and precursor peptide, rat, 28
 - placental fat transfer, diabetic rat and human, 541
 - prothrombin expression, comparison, adult rabbit liver, 266
 - pulmonary vascular resistance, prostaglandin inhibition effect, lamb, 62
 - reversible umbilical cord occlusion, effect on intrauterine thermogenesis, sheep, 513
 - sinoaortic-denervated, cardiovascular responses to hypoxemia, sheep, 381
 - substrate deprivation, plasma insulin-like growth factor I as marker for, rat, 154
 - vitamin K-dependent carboxylase activity, dexamethasone stimulation, rat hepatocyte, 281
- Galactose-1-phosphate uridylyltransferase, modulation by uridine and uridine triphosphate, rat tissue, 222
- Genetics
- cardiovascular anomalies, hereditary transmission, WKY/NCrj rats, 227
 - hepatic angiotensinogen gene regulation, fetal and pregnant rat, 252
- Gentamicin, oligonephronia induced *in utero* by, long-term effects, rat, 450
- Gestational age, effect on fetal behavior and breathing movements, sheep, 193
- Glucocorticoids, role, angiotensinogen gene expression, fetal sheep liver, 256
- Glucose
- infusion, leucine metabolism and, ovine fetus, 423
 - intolerance, peripheral insulin resistance and, obese offspring of diabetic rat, 40
 - plasma concentration, cerebral agonal glycolytic rates and, age effect, piglet, 579
- Glutamate, hippocampal efflux, ischemia effect, perinatal rat brain, 587
- Glycine, oral supplementation, ethylmalonic/adipic aciduria, 216
- Granulocyte, neutrophilic, *in vitro* grown, function and structure of, 135
- Granulocyte-colony stimulating factor, sequential administration, interleukin-6, hematopoiesis, newborn rat, 554
- Granulopoiesis, modulation, IL-6 and granulocyte-colony stimulating factor, neonatal rat, 554
- Great vessels, anomalies of, hereditary transmission, WKY/NCrj rats, 227
- Group B streptococcus, binding and ingestion, complement receptor type 3 role, murine macrophages, 118
- Growth and development
- adenylate cyclase regulation, pulmonary artery, fetal and postnatal lamb, 610
 - adipocyte volume, influencing factors, infant baboon, 534
 - age-related postnatal increase in benzodiazepine receptors, developing and adult rat, 100
 - alterations in tracheal structure, preterm and full-term newborn lambs, 170
 - atrial natriuretic factor receptors, rabbit renal glomeruli, 45
 - biochemical markers of growth velocity, 276
 - calcium channel activity, neonatal and adult cardiac myocytes, rabbit, 89
 - cyclic GMP response, rabbit renal glomeruli, 45
 - epidermal growth factor effect, intestinal transport, suckling rabbit, 342
 - glucose-modulated cerebral agonal glycolytic rates, age effect, piglet, 579
 - lactate genesis during, rat liver and muscle, 331
 - linear growth measurement, preterm infant, 464
 - magnetic resonance spectroscopy, developing human brain, 574
 - nursing effect, small bowel mucosa, newborn piglet, 337
 - oligonephronia induced *in utero*, long-term effects, rat, 450
 - prothrombin expression, adult and fetal liver, rabbit, 266
 - pulmonary artery, endothelium-dependent relaxation, piglet, 176
 - receptor-mediated cAMP production, tracheal epithelium, adult and infant ferret, 75
 - regulation of acute phase response, fetal, maternal and adult hamster, 444
 - thin filament changes, rat heart, 232
 - TRH and precursor peptide, rat, 28
 - tolbutamide effect, nondiabetic children with cystic fibrosis, 309
- Growth hormone/calcitriol, hypercalciuria due to, nephrectomized uremic weanling rat, 528
- Growth retardation, insulin-like growth factor I role, substrate-deprived fetal rat, 154
- Haemophilus influenzae* type b, after Hib polysaccharide vaccination, *in vitro* B cell secretion of IgG subclasses in children with, 124
- Haplotype, specific mutations associated with, cystic fibrosis, Switzerland, 304
- Heart
- development, thin filament changes during, rat, 232
 - myocardial contractility, blood flow acceleration and, carotid artery, neonatal lamb, 375
 - Heart ventricle, contractility, after neural crest ablation, chick embryo, 509
- Hepatocyte, postnatal changes in pyridine nucleotides, rat, 112
- Howland Award Acceptance, Robert E. Cooke, 624
- Howland Award Presentation
- Robert E. Cooke, 622
 - Roland B. Scott, 626, 627
- Hyperbilirubinemia, postnatal development of visual evoked potentials and, jaundiced rat, 469
- Hypercalciuria, after growth hormone/calcitriol therapy, nephrectomized uremic weanling rat, 528
- Hypercapnia, maternal and fetal vasopressin and catecholamine release during, 368
- Hyperglycemia, maternal, embryonic lipid uptake and, rat, 150
- Hyperphenylalaninemia, tetrahydrobiopterin loading test in patients with, 435
- Hypertension, spontaneous, innervation and contractility, rat cardiomyocyte, 207
- Hyperthermia, environmental, cardiovascular function and, rat embryo, 505
- Hyperventilation, autoregulation of cerebral blood flow restored by, postnatal piglet, 294
- Hypothyroidism, primary congenital, somatosensory evoked potentials during early therapy, neonate, 34
- Hypoxemia, cardiovascular response, sinoaortic-denervated fetal sheep, 381
- Hypoxia, neonatal, gradual warming effect, cat and dog, 165
- IGF-I: *see* Insulin-like growth factor I
- IL-2: *see* Interleukin-2
- IL-6: *see* Interleukin-6
- Immunoglobulin G, subclasses, *in vitro* secretion, 124
- Infant: *see also* Neonate
- adipocyte volume, influencing factors, baboon, 534
 - premature
 - linear growth measurement, 464
 - measurement of protein turnover rates, 418
 - protein requirements, 391
 - rotavirus diarrhea, increased β -lactoglobulin absorption during, 290
 - very low birth weight
 - lung function, idiopathic respiratory distress syndrome, 496

- marine oil-supplemented formulas, 404
oxygen toxicity, protection, Intralipid, 413
plethysmographic assessment of lung function, 501
surfactant substitution, 591
- Infant formula, marine oil-supplemented, very low birth weight infants, 404
- Insulin, sensitivity, evaluation, hyperinsulinemic-euglycemic clamp technique, obese rat, 40
- Insulin-like growth factor I
intrauterine substrate deprivation and, growth-retarded fetal rat, 154
tropoelastin synthesis stimulated by, neonatal pulmonary fibroblast, rat, 248
- Interferon gamma, neonatal deficiency, molecular mechanism, 270
- Interleukin-2, receptor binding, neonatal interferon gamma deficiency and, 270
- Interleukin-6, sequential administration, granulocyte-colony stimulating factor, hematopoiesis, newborn rat, 554
- Intestinal transport, epidermal growth factor effect, suckling rabbit, 342
- Intralipid, lung protection role, neonatal rat, 413
- Ischemia
glucose status during, age effect, piglet, 579
hippocampal glutamate efflux stimulated by, perinatal rat brain, 587
- Kidney
adaptation to taurine deprivation, phosphate-depleted rat, 146
distal nephron potassium secretion, role of cortical Na,K-ATPase, neonatal dog kidney, 457
glomeruli, ontogeny of atrial natriuretic factor receptors and cyclic GMP response, rabbit, 45
mild oligonephronia, neonatal rats of gentamicin-treated mothers, 450
renal tubular sodium potassium adenosine triphosphatase activity, ontogeny of regulation, rat, 131
- Knemometer, hand-held, validation of, 464
- Lactate, production, developing rat liver and muscle, 331
- β -Lactoglobulin, increased absorption, during rotavirus diarrhea, sugar permeability and, 290
- Lanthanum, inhibitor of surfactant secretion, newborn rabbit, 190
- Latin-American Society for Pediatric Research, abstracts for 28th annual meeting, 387
- Leucine
kinetics, during feeding, normal newborns, 23
transamination and oxidation, glucose infusion effect, ovine fetus, 423
 $[^{13}\text{C}]$ Leucine, protein turnover measured with, sick, premature neonates, 418
- Linolenic acid, -supplemented formulas, long-term feeding, very low birth weight infants, 404
- Lipase, placental activity, diabetes effect, rat and human, 541
- Lipid, embryonic uptake, effect of maternal diabetes, rat, 150
- Liver
disease, vitamin E status and, role of breath ethane test, 396
expression of C-reactive protein and serum amyloid A, regulation, fetal, maternal and adult hamster, 444
glucocorticoid regulation of angiotensinogen gene expression, fetal sheep, 256
high-energy phosphate, decrease after propionate loading, rat, 5
lactate production in, developing rat, 331
metabolic zonation, biliary cirrhosis, 286
postnatal changes in pyridine nucleotides, rat hepatocytes, 112
prothrombin expression, adult and fetal rabbit, 266
vitamin K-dependent carboxylation, dexamethasone stimulation, neonatal rat and fetal hepatocytes, 281
- Long-chain acyl-CoA dehydrogenase, deficiency, immunochemical characterization, 211
- Lung
circulation, sustained platelet-activating factor infusion, neonatal piglet, 261
corticosteroids, thyrotropin-releasing hormone, and antioxidant enzymes, preterm lamb, 518
distension, effect on fetal behavior and breathing movements, sheep, 193
end-expiratory volume, diaphragmatic electromyogram spectral analysis, piglet, 606
fluid filtration, patent ductus arteriosus effect, preterm lamb, 616
hyperoxia, prenatal TRH/dexamethasone effect, neonatal rat, 522
maturity, surfactant protein measurement, amniotic fluid, 597
oxygen toxicity, protection by Intralipid, neonatal rat, 413
rhythmic distension, prostaglandin inhibition effect, fetal lamb, 62
tropoelastin synthesis, IGF-I effect, neonatal rat fibroblast, 248
- Lung function
plethysmographic assessment, mechanically ventilated very low birth weight infants, 501
prophylactic surfactant treatment, preterm lamb, 181
- Mac-1, -related functional abnormalities, neonatal eosinophils and neutrophils, 355
- Macrophage, group B streptococcus ingestion by, role of complement receptor type 3, mouse, 118
- Maple syrup urine disease, oral L-alloisoleucine loading studies, 430
- Marine oil, -supplemented formulas, long-term feeding, very low birth weight infants, 404
- Metabolism, birth-related events and, fetal sheep, 158
- Microdialysis, ischemia effect on hippocampal glutamate efflux, perinatal rat brain, 587
- Microvillus membrane, epidermal growth factor effect, suckling rabbit, 342
- Mineral, homeostasis, growth hormone/calcitriol effect, nephrectomized uremic, weanling rat, 528
- Mitochondria, DNA deletion, congenital hypoplastic anemia, diabetes, and severe renal tubular dysfunction associated with, 327
- Monocyte, phagocytic functions and tumor necrosis factor secretion, after surfactant exposure, 69
- Muscle, lactate production in, developing rat, 331
- Muscle contraction, heart rate and blood pressure response, neonatal kitten, 95
- Myocyte
cardiac
calcium current measurements, neonatal rabbit, 83
L- and T-type calcium channels, neonatal and adult rabbit, 89
- Naloxonazine, fetal breathing patterns and, lamb, 202
- Naloxone, fetal breathing patterns and, lamb, 202
- Neonate
blood flow
cerebral, prostaglandin role in regulation of, newborn piglet, 106
velocity increase and myocardial contractility, carotid artery, lamb, 375
- cardiac myocyte
calcium current measurements, rabbit, 83
L- and T-type calcium channels, rabbit, 89
- distal nephron potassium secretion, role of cortical Na,K-ATPase, dog, 457
- endotoxin-treated, effect on organ growth and metal distribution, mice, 141
- granulocyte macrophage colony-stimulating factor production, comparison, adults, 362
- granulopoiesis, IL-6 and granulocyte-colony stimulating factor, neonatal rat, 554
- hematopoiesis, IL-6 and granulocyte-colony stimulating factor effect, rat, 554
- hyperoxia, prenatal TRH/dexamethasone effect, rat lung, 522
- hyperventilation, autoregulation of cerebral blood flow restored by, postictal piglet, 294
- hypoxia, body warming effect, cats and dogs, 165
- interferon gamma deficiency, molecular mechanism, 270
- leucine kinetics during feeding, 23
- Mac-1-related functional abnormalities, eosinophils and neutrophils, 355
- nursing effect, small bowel mucosa, newborn piglet, 337
- ontogeny of thyrotropin releasing hormone and precursor peptide, rat, 28
- organic aciduria, screening method, 315
- phosphatidylcholine synthesis, substrate utilization for, rat pneumocyte, 55
- platelet-activating factor infusion, circulatory effects, piglet, 261
- primary congenital hypothyroidism, somatosensory evoked potentials during early therapy, 34
- respiratory failure, induced by antibody to hydrophobic polypeptide, rabbit, 239
- sequential administration, IL-6 and granulocyte-colony stimulating factor, rat, 554
- static exercise, cardiovascular and respiratory response, kitten, 95
- surfactant secretion, lanthanum as inhibitor of, rabbit, 190
- tropoelastin synthesis, IGF-I effect, rat pulmonary fibroblast, 248
- vasopressin secretion, central α -1-adrenergic control, lamb, 50
- ventilatory response to CO₂, chemoreceptor role, piglet, 491
- ventricular cardiomyocyte, sympathetic innervation, spontaneously hypertensive rat, 207
- vitamin K-dependent carboxylase activity, dexamethasone stimulation, rat liver, 281
- Neutrophil, Mac-1 expression, neonate, 355

- Nursing, effect on small bowel mucosa, newborn piglet, 337
- Nutrition, recommended protein intake, infancy, 391
- Obesity, evaluation of insulin sensitivity in, diabetic rat offspring, 40
- Oligonephronia, gentamicin-induced, long-term effects, rat, 450
- Organ weight, endotoxin-treated neonatal mice, 141
- Overfeeding, adipocyte volume and, preweaning infant baboon, 534
- Oxygenation, effect on fetal behavior and breathing movements, sheep, 193
- Oxygen toxicity, Intralipid role, neonatal rat, 413
- Palmitic acid, embryonic uptake, effect of maternal diabetes, rat, 150
- Parenteral nutrition, total, identification of catabolic neonates before, 418
- Patent ductus arteriosus, lung fluid filtration and, preterm lamb, 616
- Phosphate, depletion, adaptation to taurine deprivation after, rat, 146
- Phosphatidylcholine, synthesis, substrate utilization for, neonatal rat pneumocyte, 55
- Placenta, lipase activity, maternal diabetes and, rat and human, 541
- Platelet-activating factor, sustained infusion, circulatory effects, neonatal piglet, 261
- Platelet-derived growth factor-like protein, thrombin-induced secretion, amrinone effect, endothelial cells, 351
- Plethysmography, lung function assessed by, mechanically ventilated very low birth weight infants, 501
- Pneumocyte, type II, substrate utilization for phosphatidylcholine synthesis by, neonatal rat, 55
- Polypeptide, hydrophobic, respiratory failure induced by antibody to, newborn rabbit, 239
- Potassium, secretion, role of cortical Na,K-ATPase, neonatal dog kidney, 457
- Pregnancy
acute hypercapnia, effect on vasopressin and catecholamine release, sheep, 368
angiotensinogen gene regulation during, rat liver, 252
diabetes during, placental lipase activity and, rat and human, 541
hemodynamic response to volume stress, rat, 479
- Prematurity, lung fluid filtration, patent ductus arteriosus and, lamb, 616
- Procollagen propeptide, serum concentrations, as biochemical marker of growth velocity, 276
- Propionate, metabolism disorder, 1-¹³C-propionate metabolism in patients with, 15
- Prostaglandin
inhibition, perinatal pulmonary vascular resistance and, fetal lamb, 62
role, regulation of basal cerebral blood flow, newborn piglet, 106
- Protein
dietary intake during infancy, requirements and recommendations, 391
surfactant-associated, respiratory failure induced by antibody to, newborn rabbit, 239
turnover rate, measurement, sick, premature neonates, 418
- Protein-hydrolysate formula, modified cornstarch used in, octenylsuccinic aciduria associated with, 564
- Prothrombin, mRNA expression, adult and fetal liver, rabbit, 266
- Proton magnetic resonance spectroscopy
age effect on glucose-modulated cerebral agonal glycolytic rates, piglet, 579
early metabolic development, preterm and term newborn brains, 574
- Pulmonary artery
adenylate cyclase regulation, fetal and postnatal lamb, 610
endothelium-dependent relaxation, maturation effect, piglet, 176
- Pulmonary vascular resistance, prostaglandin inhibition and, fetal lamb, 62
- Pyridine nucleotides, postnatal changes, rat hepatocytes, 112
- Pyruvate carboxylase, deficiency, benign variant, 1
- Pyruvate dehydrogenase protein, unstable variant, congenital lactic acidemia, 11
- Renal tubule, dysfunction, mitochondrial DNA deletion and, 327
- Respiratory distress syndrome
idiopathic, lung function, very low birth weight infants, 496
surfactant substitution, ventilated very low birth weight infants, 591
- Rotavirus, enteritis, increased β -lactoglobulin absorption during, 290
- Seizure, generalized, central benzodiazepine binding site changes after, developing rat, 100
- Serum amyloid A, expression, developmental regulation, hamster, 444
- Sister chromatid exchange, peripheral blood lymphocytes, after vitamin K prophylaxis, 550
- Small bowel, mucosa, nursing effect, newborn piglet, 337
- Society for Pediatric Research, 1991 Presidential Address, 301
- Sodium potassium adenosine triphosphatase, renal tubular activity, ontogeny of regulation, rat, 131
- Somatosensory evoked potentials, primary congenital hypothyroidism, early therapy, neonate, 34
- Substrate
intrauterine deprivation, plasma insulin-like growth factor I as marker for, fetal rat, 154
utilization, neonatal rat pneumocytes, 55
- Sugar, permeability, macromolecular absorption in diarrhea and, 290
- Surfactant
natural porcine, effect on human monocyte functions, 69
prophylactic treatment, preterm lamb, 181
proteins A and B, amniotic fluid, indices of fetal lung maturity, 597
secretion, lanthanum inhibition, newborn rabbit, 190
substitution, response types, very low birth weight infants, 591
- Taurine, deprivation, adaptation, phosphate-depleted rat, 146
- T cell, defective interferon gamma production, IL-2 receptor binding and, neonate, 270
- Tetrahydrobiopterin, loading test, hyperphenylalaninemic patients, 435
- Tetralogy of Fallot, hereditary transmission, WKY/NCrj rats, 227
- Thermogenesis, intrauterine, reversible umbilical cord occlusion and, sheep, 513
- Thrombopoiesis, modulation, IL-6 and granulocyte-colony stimulating factor, neonatal rat, 554
- Thyrotropin-releasing hormone
effect on antioxidant enzyme activity, ventilated immature lamb lung, 518
ontogeny of, fetal and neonatal rat, 28
prenatal treatment, hyperoxia response and, neonatal rat lung, 522
- Tolbutamide, effect on growth and body composition, nondiabetic children with cystic fibrosis, 309
- Trachea, epithelium, receptor-mediated cAMP production, adult and infant ferret, 75
- TRH: see Thyrotropin-releasing hormone
- Triglyceride, medium chain, effect, ethylmalonic/adipic aciduria, 216
- Tropoelastin, synthesis, IGF-I stimulation, neonatal pulmonary fibroblast, rat, 248
- Troponin isoform, role, rat cardiac thin filament development, 232
- Tumor necrosis factor, secretion, surfactant exposure effect, human monocytes, 69
- Umbilical cord
blood, *in vitro* grown human granulocytes, 135
reversible occlusion, thermogenesis *in utero* and, sheep, 513
- Uremia, growth hormone/calcitriol therapy, hypercalciuria due to, nephrectomized weanling rat, 528
- Uridine, modulation of galactose-1-phosphate uridylyltransferase, rat tissue, 222
- Uridine triphosphate, modulation of galactose-1-phosphate uridylyltransferase, rat tissue, 222
- Urine, filter paper samples, neonatal screening, organic aciduria, 315
- Valine, metabolism, 3-hydroxyisobutyric aciduria as inborn error of, 322
- Vasopressin
 α -1-adrenergic control, neonatal lamb, 50
maternal and fetal, acute hypercapnia effect, sheep, 368
- Ventilation
body warming effect, hypoxic newborn cats and dogs, 165
mechanical
lung function, very low birth weight infants with idiopathic respiratory distress syndrome, 496
plethysmographic lung function assessment, very low birth weight infants, 501
prophylactic surfactant treatment effect, preterm lamb, 181
- Visual evoked potential, flash, postnatal development, jaundiced rat, 469
- Vitamin E, status, breath ethane as biomarker of, 396
- Vitamin K, prophylaxis, chromosome aberrations and sister chromatid exchanges after, 550
- Zinc, distribution, endotoxin-treated neonatal mice, 141
