

## Subject Index to Volume 32

- Absorptiometry, dual energy x-ray, bone mineral content measurement, neonate, 77
- Acetylcholine, coronary vasoconstriction induced by, neonatal pig, 236
- Aciduria, 3-methylglutaconic, mitochondrial ATP-synthase deficiency in child with, 731
- Actin, comparative polymerization, adult and neonatal bovine neutrophils, 509
- Adenosine triphosphate, -sensitive potassium channels, neonatal and adult ventricular myocytes, rabbit, 230
- Adipose tissue, development, thyroxine role, fetal pig, 204
- $\beta$ -Adrenergic receptor, characterization, human fetal lung type II cells, 350
- Alae nasi, activation during oral feeding, preterm infants, 679
- American Pediatric Society, 1992 presidential address, 373
- Amino acid, comparison, protein turnover rates in neonates receiving parenteral nutrition, 447
- Aminophylline, effect on diaphragmatic fatigue, piglet, 580
- Antibody  
human repertoire, development of, 257  
maternal deficiency, antiidiotypic antibody induction in offspring, 150  
non-maternal, offspring of mothers with antibody deficiencies, 150
- Antigen, early dietary, development of gut mucosal barrier delayed by, preweaning rat, 301
- Apolipoprotein, synthesis, intestinal explants, newborn piglet, 553
- Arousal response, decrement after hypoxemia exposure, naloxone effect, lamb, 222
- Arterial oxygen, tension threshold range, arousal onset and breathing, fetal sheep, 342
- ATP-synthase, mitochondrial deficiency, in child with 3-methylglutaconic aciduria, 731
- Atrioventricular node, propafenone effects, rabbit, 658
- Auditory brainstem response  
amplitude changes, effect on neuron-specific enolase levels, piglet, 524  
in transient neonatal hypothyroxinemia, preterm infants, 530
- Betamethasone/thyrotropin releasing hormone, maternal administration, somatosensory evoked potentials after, preterm newborns, 212
- Bilirubin, encephalopathy, neuron-specific enolase in, piglet, 524
- Blood, viscosity, determination, preterm and full-term neonates, 97
- Blood flow  
cerebral  
response to hypertension, phenobarbital-treated newborn pig, 103  
response to hypocarbia in postasphyxia newborn lambs, 537
- Blood pressure  
measurement, random-zero sphygmomanometer, 243  
oxygen supplementation effect, hypoxic newborn pig, 107
- Bone mineral content, measurement, dual energy x-ray absorptiometry, neonate, 77
- Brain  
capillary network, quantitative determination of morphometric indices, newborn pig, 542  
cerebral oxidative metabolism, during hypothermia and circulatory arrest, newborn dog, 547  
effect of postischemic hyperglycemia, neonatal rat, 489  
heme oxygenase-2 protein activity, tin-protoporphyrin effects, rat, 324  
phenobarbital effects, during hypertension and hypoxia, newborn pig, 103  
quinolinate measurement, rat model of congenital hyperammonemia, 483
- Brain damage, hypoxic, oxygen supplementation effect, newborn pig, 107
- Breath test, noninvasive, starch digestion, cystic fibrosis patients, 45
- Bronchopulmonary dysplasia, loaded breathing, respiratory drive and adaptation to, 356
- Brush-border membrane vesicles, carrier-mediated  $\beta$ -D-hydroxybutyrate transport in, rat placenta, 317
- Caffeine  
during lactational period, cardiac effects, rat, 330  
effect on diaphragmatic fatigue, piglet, 580
- Capillary, total and perfused, quantitative determination of morphometric indices, newborn pig brain, 542
- Carbohydrate, myocardial uptake, shunt lambs, 27
- Cardiology, research, review of submitted abstracts, 1990, 10
- Cardiovascular system, neonatal adaptation, *in situ* morphology, rat, 386
- Carnitine, enterohepatic distribution, developing piglet, 312
- CD34<sup>+</sup> progenitor cells, isolation and separation, umbilical cord blood, 277
- Cell injury, by reactive oxygen metabolites, differential sensitivity to, fibroblasts and endothelial cells, 654
- Cerebrospinal fluid, quinolinate measurement, rat model of congenital hyperammonemia, 483
- Cerebrovascular reactivity, alterations, after positive pressure ventilation, newborn pig, 114
- Ceroid lipofuscinose, neuronal, molecular genetics, 645
- Chemoreceptor, arterial peripheral, response time, preterm infants, 226
- Chest wall, instability, inspiratory resistive loading effect, preterm infant, 589
- Cholesteryl ester storage disease, lovastatin safety and efficacy, 559
- Chondrocyte, epiphyseal, somatostatin effects, 571
- Chondrodysplasia punctata, phytanic acid  $\alpha$ -oxidation in, 566
- Circulatory arrest, hypothermic, cerebral oxidative metabolism during, newborn dog, 547
- L-Citrulline, transport, across rat intestine, 472
- Copper, intake and status, very low birth weight infants during first year, 183
- Corticosterone, dietary, role, neonatal macromolecular absorption, rat, 50
- Corticotropin-releasing hormone, stimulation test, nocturnal cortisol levels and, 64
- Cortisol, nocturnal levels, corticotropin-releasing hormone stimulation test, 64
- Cyclosporin A, taurine transport impaired by, human placental cell line, 125
- Cystic fibrosis  
genotype/phenotype association, mutation analysis, 175  
pancreatic-sufficient, exocrine pancreatic function decline in patients with, 179  
starch digestion, noninvasive breath test for, 45
- Cystine, intracellular loading, proximal tubule respiratory dysfunction caused by, rabbit, 710
- Cytotoxicity, monosaturated and polyunsaturated fatty acids, cultured hamster cells, 366
- Dehydration, hypernatremic, cerebral taurine transport and, rat, 118
- Dexamethasone  
combined with TRH, prenatal, hyperoxia survival shortened by, rat, 407  
prenatal treatment, response to hyperoxic challenge after, newborn rat, 215  
synergistic effects of thyroxine and, enzyme ontogeny, rat small intestine, 306
- Diaphragm  
fatigue, methylxanthine effect, piglet, 580  
nitrofen-induced hernia, oxygen defense mechanisms, rat, 394
- Diarrhea, circulating antibody secreting cell response, enhancement, *Lactobacillus* strain, 141
- Dichloroethylene, cardiac teratogenicity, chick model, 23
- Dihydropteridine reductase, atypical deficiency, neurochemical evaluation and mutation detection, 726
- Docosahexaenoic acid, status, breast-fed vs. oil-containing formula-fed term infants, 683
- Dorsal root ganglia, latency *in vitro* of varicella-zoster virus in cells derived from, 699
- Down syndrome, thymocyte proliferation, regulation by tumor necrosis factor- $\alpha$  and interferon- $\gamma$ , 269
- Duchenne muscular dystrophy, revertant frequency, mouse model, 128
- Ductus venosus, ultrasonic assessment, human fetus, 338
- Embryo, early cardiac development, dynamic atrial dimension during, chick, 333

- Encephalopathy  
 bilirubin, neuron-specific enolase in, piglet, 524  
 neuronal ceroid lipofuscinosis, molecular genetics of, 645
- Endothelial cells, antioxidant defense mechanisms, role of glutathione redox cycle and catalase, 360
- Energy expenditure  
 sleep organization and, breast-fed and formula-fed infants, 514  
 theophylline-treated preterm infants, 693
- Enolase, neuron-specific, in bilirubin encephalopathy, piglet, 524
- Enzyme  
 branching, inherited deficiency, feline glycogen storage disease type IV, 719  
 antioxidant, role, diaphragmatic hernia, rat, 394  
 ontogeny, synergistic effects of thyroxine and dexamethasone on, rat small intestine, 306
- Eosinophil  
 activation, respiratory syncytial virus, 160  
 L-selectin expression and regulation, human adults and neonates, 465
- Epithelium, hyperoxia-induced injury, prostaglandin E<sub>2</sub> effect, rabbit trachea, 87
- Erythrocyte  
 aging process, hemoglobin F and, neonate, 165  
 membrane, mechanical fragility, neonates and adults, 92  
 oxidative stress, glutathione recycling during, neonate, 399
- Erythroid progenitor cells, enhanced response to hGH and IGF-1, children with insufficient GH secretion, 282
- Ethanol, prenatal exposure, effect on postnatal maturation of small intestine and liver, rat, 574
- European Society for Pediatric Research, abstracts of 1992 annual meeting, 609
- Fatty acids: *see also* Free fatty acids  
 monosaturated and polyunsaturated, effect on oxygen toxicity, cultured hamster cells, 366  
 myocardial uptake, shunt lambs, 27
- FcRIII, increasing receptor production, during late pregnancy and after preterm birth, 505
- Feeding, cardiovascular responses to, newborn piglet, 33
- Fetus  
 adipose tissue and skin differentiation, thyroxine role, pig, 204  
 cultured epiphyseal chondrocytes, somatostatin effects, 571  
 dorsal root ganglia, *in vitro* latency of varicella-zoster virus in cells from, 699  
 fibroblast, binding of placental lactogen and GH to, sheep, 200  
 GH-binding proteins, serum levels, 69  
 hematopoiesis, alterations, maternal HIV infection, 155  
 hepatic lipid metabolism, guinea pig model of intrauterine growth retardation, 441  
 hepatocyte, glycogenic response to glucose, rat, 714  
*in situ* morphology of foramen ovale, rat, 669  
 intestinal mucosal immunity, comparison, newborn, 145  
 lung type II cells,  $\beta$ -adrenergic receptor characterization in, 350  
 morphology of ductus venosus, rat, 386  
 onset of arousal and breathing, arterial oxygen tension threshold range for, sheep, 342  
 subdiaphragmatic area, venous distribution, ultrasonic visualization, 338  
 thoracic duct lymph flow, outflow pressure effect, sheep, 585  
 tissue growth and glucose utilization, effect of maternal hypoglycemia, rat, 436
- Fibroblasts  
 binding of placental lactogen and GH to, fetal sheep, 200  
 sensitivity to reactive oxygen metabolites, comparison, endothelial cells, 654
- Foramen ovale, *in situ* morphology, fetal and neonatal rat, 669
- Free fatty acids, hepatic metabolism, guinea pig model of intrauterine growth retardation, 441
- Galactose, intolerance, magnetic resonance spectroscopy study, human and rat liver, 39
- Gaucher disease, neonatal, distinct phenotype of, 494
- Genetics  
 molecular, neuronal ceroid lipofuscinosis, 645  
 mutation detection, atypical forms of dihydropteridine reductase deficiency, 726  
 new OTC gene mutations, 600  
 ontogeny of kininogen gene expression, rat, 649  
 pulmonary metallothionein gene expression, late gestational lamb, 424  
 targeted disruption of glucocerebrosidase gene, mouse model of Gaucher disease, 494
- Glucagon, role, regulation of enterohepatic carnitine distribution, piglet, 312
- Glucocerebrosidase gene, targeted disruption, mouse model of Gaucher disease, 494
- Glucose  
 glycogenic response, fetal and adult rat hepatocyte, 714  
 production, theophylline-treated preterm infants, 693  
 utilization, fetal, effect of maternal hypoglycemia, rat, 436
- Glutathione, recycling, during oxidative stress, neonatal erythrocytes, 399
- Glutathione peroxidase, levels, premature infants, low selenium community, 189
- Glycogenesis, regulation by medium glucose, fetal and adult rat hepatocyte, 714
- Glycogen storage disease, type IV, clinical, pathologic, biochemical and genetic characteristics, cat, 719
- Growth and development  
 adipose tissue and skin differentiation, thyroxine influence, fetal pig, 204  
 anion transport in cardiac sarcoplasmic reticulum, fetal and adult rabbit, 664  
 ATP-sensitive potassium channels, ventricular myocytes, neonatal and adult rabbit, 230  
 comparative actin polymerization, neonatal and adult bovine neutrophils, 509  
 dietary protein effect, recovering shigellosis patients, 689  
 differential developmental expression of kininogen genes, rat, 649  
 erythrocyte membrane fragility, neonates and adults, 92  
 fate of the endocardial cushions, developing chick heart, 390  
 glycogenesis, regulation, fetal and adult rat hepatocyte, 714  
 gut mucosal barrier, effect of early dietary antigens, preweaning rat, 301  
 inspiratory resistive loading effects, preterm and full-term infants, 589  
 intestinal mucosal immunity, fetus and newborn, 145  
 jejunal closure, dietary corticosterone role, 50  
 pulmonary metallothionein gene expression, late gestational lamb, 424  
 regulation of L-selectin on eosinophils, human adults and neonates, 465  
 renal phosphate transport maturation, early weaning and, rat, 704  
 serum GH-binding proteins, human fetus and infant, 69  
 T cell functional changes, ontogeny of cellular immunity and, 81  
 Growth factors, hematopoietic, response of CD34<sup>+</sup> progenitor cells to, umbilical cord blood, 277
- Growth hormone  
 binding, fetal sheep fibroblasts, 200  
 insufficient secretion, erythropoietic effects of hGH and IGF-I in children with, 282  
 pulsatile, deconvolution analysis, neonate, 286  
 urinary measurements, normal and short children, 73
- Growth retardation  
 intrauterine  
 after uterine artery ligation, rat, 291  
 hepatic lipid metabolism, guinea pig, 441
- Gut, mucosal immunity, development, fetus and neonate, 145
- Haemophilus influenzae* b polysaccharide, vaccine-induced human antibody responses, immunodeficient mice, 132
- Haemophilus influenzae* type b, human immune response to, 257
- Heart  
 anion transport in sarcoplasmic reticulum, fetal and adult rabbit, 664  
 dichloroethylene teratogenicity, chick model, 23  
 early development, dynamic atrial dimension and function during, chick embryo, 333  
 fate of the atrioventricular endocardial cushions, developing chick, 390  
 propafenone effects, rabbit atrioventricular node, 658  
 vasoconstriction, acetylcholine-induced, neonatal pig, 236  
 ventricular myocytes, ATP-sensitive potassium channels, neonatal and adult rabbit, 230  
 zinc and metallothionein levels, effect of dietary caffeine, neonatal rat, 330
- Hematocrit, optimal, determination, preterm and full-term neonates, 97
- Hematopoiesis, alterations, fetus, HIV infected mothers, 155
- Heme oxygenase isoforms, tin-protoporphyrin effect, rat brain, 324
- Hemoglobin F, oxidation, aging of neonatal red blood cells and, 165
- Hepatitis B virus, S gene mutations, mother to child transmission of hepatitis B related to, 264
- Hepatocyte, glycogenic response to glucose, fetal and adult rat, 714
- HIV: *see* Human immunodeficiency virus

- Howland Award  
 acceptance by Gilbert B. Forbes, 502  
 presentation, 499
- Human immunodeficiency virus, maternal infections, fetal hematopoiesis and, 155
- Hydrocarbon, halogenated, dichloroethylene-related cardiac teratogenicity, chick, 23
- $\beta$ -D-Hydroxybutyrate, carrier-mediated transport, brush-border membrane vesicles, rat placenta, 317
- Hyperammonemia, congenital, quinolinate measurement, rat brain and CSF, 483
- Hyperglycemia  
 maternal, fetal rat tissue growth and glucose utilization, 436  
 postischemic, effect on neonatal rat brain, 489
- Hypernatremia, cerebral taurine transport, rat, 118
- Hyperoxia  
 antioxidant enzyme response, after prenatal TRH or TRH plus dexamethasone, rat, 407  
 -induced injury, prostaglandin E<sub>2</sub> effect, rabbit tracheal epithelial cells, 87
- Hypertension, with and without hypoxia, cerebral blood flow response, phenobarbital-treated newborn pig, 103
- Hypocarbica, response of cerebral circulation to, postasphyxia newborn lambs, 537
- Hypothermia, cerebral oxidative metabolism during, newborn dog, 547
- Hypothyroxinemia, transient neonatal, auditory brainstem evoked response in, 530
- Hypoxanthine, plasma levels, after oxygen supplementation, hypoxic newborn pig, 107
- Hypoxemia, arousal response decrement after, naloxone effect, lamb, 222
- Hypoxia  
 phenobarbital effect, hypertensive newborn pig, 103  
 resuscitation, room air *versus* 100% oxygen, newborn pig, 107  
 ventilatory response, small preterm infants, 403
- IFN: *see* Interferon
- Immune system, development of human antibody repertoire, 257
- Immunization, hepatitis B virus, mother to child transmission of HBV despite, 264
- Immunoglobulin, development of human antibody repertoire, 257
- Infant  
 GH-binding proteins, serum levels, 69  
 metabolism and water loss, effect of mild cold stress on, 417  
 preterm  
 activation of plasma kallikrein-kinin system in respiratory distress syndrome, 431  
 alae nasi activation during oral feeding, 679  
 auditory brainstem evoked response in neonatal hypothyroxinemia, 530  
 effect of prenatal thyrotropin-releasing hormone treatment, 673  
 effects of inspiratory resistive loading, 589  
 elevated GH secretory rate, 286  
 parenteral nutrition, protein turnover changes after, 447  
 reduced membrane-associated FcRIII expression, 505  
 response time, peripheral chemoreceptors, 226  
 selenium and glutathione peroxidase levels, low selenium community, 189  
 somatosensory evoked potentials after fetal betamethasone/thyrotropin releasing hormone therapy, 212  
 theophylline effect on energy expenditure, lipolysis, and glucose production, 693  
 ventilatory response to hypoxia, 403  
 very low birth weight, copper status during first year, 183
- Infant feeding/nutrition  
 docosahexaenoic acid status, breast-fed *versus* oil-containing formula-fed term infants, 683  
 oral, alae nasi activation during, preterm infants, 679  
 sleep organization influenced by, breast-fed and formula-fed infants, 514
- Infant formula  
 oil-containing, docosahexaenoic acid status in term infants receiving, 683  
 polyamine concentration, 58
- Inferior vena cava, ultrasonic assessment, human fetus, 338
- Insulin, role, regulation of enterohepatic carnitine distribution, piglet, 312
- Insulin-like growth factor, decreased activity, intrauterine growth retardation related to, rat, 291
- Insulin-like growth factor-I  
 desipeptide, isolation and characterization, bovine somatotropin-treated cows, 296  
 erythroid progenitor cell response to, children with insufficient GH secretion, 282  
 receptor, autoantibodies to, low prevalence, short stature children, 455
- Interferon  
 regulation of thymocyte proliferation by, Down syndrome, 269  
 role, newborn host defense against *Listeria monocytogenes*, 460
- Interleukin-4, human thymocyte proliferation induced by, Down syndrome, 269
- Intestinal mucosa, immunity development, fetus and newborn, 145
- Jejunum, closure, role of dietary corticosterone, neonatal rat, 50
- Kallikrein-kinin, plasma system, activation, respiratory distress syndrome, 431
- Ketone, myocardial uptake, shunt lambs, 27
- Kidney  
 phosphate transport maturation, early weaning effects, rat, 704  
 renal tubular epithelial cells, antioxidant defense mechanisms, 360
- Kininogen gene, differential developmental expression, rat liver, 649
- Lactobacillus*, effect on intestinal immune response, human diarrhea, 141
- Lipolysis, theophylline-treated preterm infants, 693
- Listeria monocytogenes*, newborn host defense against, role of TNF- $\alpha$  and IFN- $\gamma$ , 460
- Liver  
 differential developmental expression of kininogen genes, rat, 649  
 galactose intolerance, magnetic resonance spectroscopic study, human and rat, 39  
 lipid metabolism by, guinea pig model of intrauterine growth retardation, 441  
 postnatal maturation, prenatal ethanol exposure effect, rat, 574
- Local anesthesia, eutectic mixture, effectiveness, venipuncture patients, 520
- Lovastatin, safety and efficacy, pediatric cholesteryl ester storage disease, 559
- Lung  
 adaptation, loaded breathing in bronchopulmonary dysplasia, 356  
 antioxidant enzyme, role, diaphragmatic hernia, rat, 394  
 immediate effects of surfactant, preterm lamb, 595  
 pulmonary metallothionein genes, expression, late gestational lamb, 424  
 type II cells,  $\beta$ -adrenergic receptor characterization, human fetus, 350
- Luteinizing hormone, pulsatile and sexually dimorphic secretion of, postnatal day 1, 605
- Lymph, flow rate, outflow pressure effect, fetal sheep, 585
- Malaria, design of conjugate vaccines for, 376
- Meningitis, bacterial, design of conjugate vaccines for, 376
- Meperidine, maternal administration, neonatal pattern of breathing after, 412
- Metabolic rate, environmental temperature and, 417
- Metallothionein  
 effect of dietary caffeine, neonatal rat heart, 330  
 pulmonary genes, expression of, late gestational lamb, 424
- Methylxanthines, effect on diaphragmatic fatigue, piglet, 580
- Milk  
 bovine somatotropin-treated cows, isolation of desipeptide IGF-I from, 296  
 human, polyamine concentration, 58  
 rat, polyamine concentration, 58
- Mitochondria  
 ATP-synthase deficiency, child with 3-methylglutaconic aciduria, 731  
 myopathy, permeabilized muscle fibers, 17
- Muscle fiber, permeabilized, mitochondria myopathy studies, 17
- Myocardium, substrate uptake, shunt lambs, 27
- Naloxone, effect on arousal response decrement, after hypoxemia exposure during sleep, lamb, 222
- Neisseria gonorrhoeae*, design of conjugate vaccine for, 376
- Neonate  
 antiidiotypic antibody induction, 150  
 apolipoprotein synthesis, piglet intestinal explants, 553  
 autonomic reactivity, cardiovascular responses to feeding, newborn pig, 33  
 blood viscosity and optimal hematocrit, preterm and full-term subjects, 97  
 bone mineral content, measurement, dual energy x-ray absorptiometry, 77  
 brain capillary network, quantitative determination of morphometric indices, pig, 542  
 cardiac effects of dietary caffeine during lactation, rat, 330  
 CD34<sup>+</sup> cord blood cells, stem cell factor and PIXY321 effects, 277  
 cerebral blood flow, response to hypocarbica after asphyxia, lamb, 537  
 erythrocytes

- glutathione recycling during oxidative stress in, 399  
 membrane fragility, comparison, adults, 92  
 feeding, cardiovascular responses, piglet, 33  
 Gaucher disease, distinct phenotype analogous to a mouse model, 494  
 host defense against *Listeria monocytogenes*, role of TNF- $\alpha$  and IFN- $\gamma$ , 460  
 hyperoxic challenge  
 prenatal dexamethasone effect, rat, 215  
 prenatal TRH or TRH plus dexamethasone effect, rat, 407  
 hypothermia and circulatory arrest, cerebral oxidative metabolism during, dog, 547  
 hypoxic, oxygen supplementation, pig, 107  
*in situ* morphology of foramen ovale, rat, 669  
 intestinal mucosal immunity, comparison, fetus, 145  
 ischemia, effect of hyperglycemia after, rat brain, 489  
 luteinizing hormone secretion, dynamics of, postnatal day 1, 605  
 macromolecular absorption, dietary corticosterone role, rat, 50  
 mitochondrial myopathy studies, permeabilized muscle fibers, 17  
 modified natural surfactant treatment, cerebral hemodynamic effects, 532  
 morphology of ductus venosus, rat, 386  
 pattern of breathing, after maternal meperidine, 412  
 positive pressure ventilation, cerebrovascular reactivity alterations after, pig, 114  
 pulsatile GH secretion, deconvolution analysis of, 286  
 red blood cell aging process, hemoglobin F oxidation and, 165  
 regulation of enterohepatic carnitine distribution, glucagon and insulin role, piglet, 312
- Neutrophil**  
 comparative actin polymerization, neonatal and adult, 509  
 reduced FcRIII expression by, preterm neonate, 505
- Nutrition**  
 effect of early dietary antigens, gut mucosal barrier, preweaning rat, 301  
 high-protein diet effect, effect on catch-up growth, shigellosis patients, 689  
 research and training, NICHD plan for, 1  
 selenium supplementation, premature infants, low selenium community, 189
- Ornithine transcarbamylase**, new gene mutations, OTC-deficient patients, 600
- OTC**: *see* Ornithine transcarbamylase
- Oxidant stress**, role of glutathione redox cycle and catalase, endothelial and renal tubular epithelial cells, 360
- Oxygen**  
 consumption, cystine-loaded proximal tubules, rabbit, 710  
 reactive metabolites, differential sensitivity, human fibroblasts and endothelial cells, 654  
 response time, peripheral chemoreceptors, preterm infants, 226  
 supplementation, reoxygenation of hypoxic newborn, newborn pig, 107  
 toxicity  
 prenatal dexamethasone treatment effect, rat, 215
- fatty acids effects, cultured hamster cells, 366
- Pain**, perception, effectiveness of eutectic mixture of local anesthetics and, venipuncture patients, 520
- Pancreas**, exocrine function, decline, cystic fibrosis patients with pancreatic sufficiency, 179
- Parenteral nutrition**, neonatal, protein turnover rates with two amino acid solutions, 447
- PDC**: *see* Pyruvate dehydrogenase
- Phenobarbital**, cerebral blood flow and, during hypertension and hypoxia, newborn pig, 103
- Phosphate**, renal transport maturation, effects of early weaning, rat, 704
- Phytanic acid**,  $\alpha$ -hydroxylation of, Refsum's disease and chondrodysplasia punctata, 566
- Placenta**  
 carrier-mediated  $\beta$ -D-hydroxybutyrate transport, rat, 317  
 perfused, retinol transfer and metabolism by, 195  
 taurine transport, impairment by cyclosporin A, 125
- Placental lactogen**, binding, fetal sheep fibroblasts, 200
- Polyamine**, concentration, rat milk, human milk, infant formulas, 58
- Polysaccharide**, vaccine-induced human antibody responses, immunodeficient mice, 132
- Potassium**, ATP-sensitive channels, neonatal and adult ventricular myocytes, rabbit, 230
- Prematurity**, immediate pulmonary effects of surfactant, preterm lamb, 595
- Prolidase**, deficiency, cultured human fibroblasts, 479
- Propafenone**, developmental cellular electrophysiologic effects, rabbit atrioventricular node, 658
- Prostaglandin E<sub>2</sub>**, hyperoxia-induced injury and, rabbit tracheal epithelial cells, 87
- Prostanoids**, vasoactive, increased biosynthesis, Schönlein-Henoch purpura, 137
- Protein**  
 GH-binding, serum levels, human fetus and infant, 69  
 -rich diet, effect on catch-up growth after shigellosis, 689  
 turnover rates, after parenteral nutrition introduction, preterm infants, 447
- Proximal tubule**, cystine-loaded, respiratory dysfunction caused by, rabbit, 710
- Pseudomonas aeruginosa*, design of conjugate vaccine for, 376
- Pyruvate dehydrogenase**, mutation, variable expression of PDC deficiency caused by, 169
- Quinolate**, brain and CSF levels, rat model of congenital hyperammonemia, 483
- Refsum's disease**, phytanic acid  $\alpha$ -oxidation in, 566
- Respiration**  
 during active and quiet sleep, neonate, after maternal meperidine, 412  
 onset, arterial oxygen tension threshold range for, fetal sheep, 342
- Respiratory distress syndrome**, activation of plasma kallikrein-kinin system in, 431
- Respiratory syncytial virus**, eosinophil activation by, 160
- Retinol**, transfer and metabolism, perfused human placenta, 195
- Revertant**, frequency, Duchenne muscular dystrophy, mouse model, 128
- Rose's tape**, evaluation, blood pressure measurement accuracy, 243
- Sarcoplasmic reticulum**, anion transport, fetal and adult rabbit heart, 664
- Schönlein-Henoch purpura**, biosynthesis of vasoactive prostanoids in, 137
- L-Selectin**, expression and regulation, eosinophils from human adults and neonates, 465
- Selenium**, levels, premature infants, low selenium community, 189
- Shigellosis**, catch-up growth after, protein-rich diet effect, 689
- Short stature**  
 IGF-I receptor autoantibodies in children with, 455  
 urinary GH measurements, clinical usefulness, 73
- Shunt**, aortopulmonary, myocardial substrate uptake in lambs with, 27
- Sleep organization**, energy expenditure and, breast-fed and formula-fed infants, 514
- Sleep state**, environmental temperature and, 417
- Small intestine**  
 apolipoprotein synthesis, newborn piglet explants, 553  
 L-citrulline transport across, rat, 472  
 enzyme ontogeny, synergistic effects of thyroxine and dexamethasone on, rat, 306  
 postnatal maturation, prenatal ethanol exposure effect, rat, 574
- Sociedad Latinoamericana de Endocrinología Pediátrica**, abstracts from 5th annual meeting, 249
- Society for Pediatric Research**, 1992 presidential address, 641
- Somatomedin**, isolation, bovine somatotropin-treated cows milk, 296
- Somatosensory evoked potentials**, effect of prenatal betamethasone/thyrotropin, preterm newborns, 212
- Somatostatin**, effects on cultured human fetal epiphyseal chondrocytes, 571
- Spectroscopy**  
 magnetic resonance, galactose intolerance studies, human and rat liver, 39  
 near infrared, effects of surfactant treatment studied by, 532
- Sphygmomanometer**, random-zero, blood pressure measurement, 243
- Starch**, digestion, <sup>13</sup>C breath test for, cystic fibrosis patients, 45
- Stem cell factor**, effect on myeloid progenitor formation, human umbilical cord blood, 277
- Stress**, response patterns, measurement, normal children, 64
- Surfactant**  
 modified natural, cerebral hemodynamic effects, neonates, 532  
 natural, lung volume and ventilation effects, preterm lamb, 595
- Taurine**  
 cerebral transport, in hypernatremic dehydration, rat, 118  
 transport, cyclosporin A effect, human placental cell line, 125
- T cell**, functional changes, ontogeny of cellular immunity and, 81
- Temperature**, environmental, metabolic rate,

- sleep state, and water loss related to, 417
- Theophylline, effect on energy expenditure, lipolysis, and glucose production, preterm infants, 693
- Thoracic duct, lymph flow rate, outflow pressure effect, fetal sheep, 585
- Thyroid function, after prenatal thyrotropin-releasing hormone, preterm infants and their mothers, 673
- Thyroid releasing hormone, prenatal, effect on hyperoxia survival, neonatal rat, 407
- Thyrotropin-releasing hormone, prenatal treatment, effects on premature infants and their mothers, 673
- Thyroxine  
 role, differentiation of adipose tissue and skin, fetal pig, 204  
 synergistic effects of dexamethasone and, enzyme ontogeny, rat small intestine, 306
- Tin-protoporphyrin, effects on heme oxygenase-2 protein activity, rat brain, 324
- Tissue growth, effect of maternal hypoglycemia, fetal rat, 436
- TNF: *see* Tumor necrosis factor
- Trachea, epithelial cells, hyperoxia-induced injury, prostaglandin E<sub>2</sub> effect, rabbit, 87
- TRH: *see* Thyroid releasing hormone
- Triacylglycerols, hepatic metabolism, guinea pig model of intrauterine growth retardation, 441
- Tumor necrosis factor- $\alpha$   
 regulation of thymocyte proliferation by, Down syndrome, 269  
 role, newborn host defense against *Listeria monocytogenes*, 460
- Ultrasound, assessment, fetal subdiaphragmatic vestibulum, 338
- Uterine artery, ligation, IGF regulation and intrauterine growth retardation after, rat, 291
- Vaccine  
 conjugate, rational design of, 376  
 hepatitis B virus, escaped mutants, 264
- Varicella-Zoster virus, latency *in vitro*, fetal dorsal root ganglia cells, 699
- Venipuncture, determinants of pain perception in children undergoing, 520
- Ventilation  
 artificial, effect on antioxidant defense mechanisms, congenital diaphragmatic hernia, rat, 394  
 effect of inspiratory resistive loading, preterm and full-term infants, 589  
 homogeneity, effect of natural surfactant, preterm lamb, 595  
 positive pressure, cerebrovascular reactivity alterations after, 114  
 response to hypoxia, small preterm infants, 403
- Water loss, evaporative, environmental temperature and, 417
- Weaning, early, effect on phosphate transport maturation, rat kidney, 704
- Zinc, effect of dietary caffeine, neonatal rat heart, 330
