

Subject Index to Volume 37

- Abdominal pain, recurrent, celiac disease and, low incidence in The Netherlands, 213
- Academic Bulletin Board, 512
- Acidemia, 3-methylglutaconic, Smith-Lemli-Opitz syndrome and, 671
- ACTH, *see* Adrenocorticotrophic hormone
- Actin, developing stomach and, 202
- Acyl-CoA dehydrogenase, deficiency, neonatal screening study in Pennsylvania, incidence and mutation frequency rates, 675
- Adenosine, role, inhibiting nonshivering thermogenesis, fetal sheep, 303
- Adolescent
glycoprotein syndrome type 1, endocrinology of, 395
salivary cortisol levels, 502
- Adrenal cortical function, salivary cortisol levels and, childhood through adolescence, 502
- Adrenal insufficiency, plasma cortisol concentrations and, VLBW infants, 112
- Adrenocorticotrophic hormone
growth-promoting actions, T-lymphoblast cell lines, 507
levels, interleukin-1 β effects, infant and prepubertal rats, 714
- Amine metabolism, biogenic, neurologic disorders and, during methotrexate therapy for leukemia, 151
- Amino acid
metabolism, phenylalanine levels and, proton nuclear magnetic resonance spectroscopy analysis, 244
transport properties, during gestation, 571
- Amniotic fluid, cytokine expression, reverse transcriptase polymerase chain reaction detection, 450
- Angiotensin II, furosemide and, effects, kidney growth and development, rat, 747
- Antiinflammatory drugs, nonsteroidal, role as antipyretics for infants, retinal prostaglandin level effects, 81
- Antioxidant enzyme
activity, after hyperoxia, endotoxin and dexamethasone effects, preterm infants, 469
status, plasma copper and, children with Wilson's disease, 219
thyrotropin and dexamethasone effects, fetal rats, 611
- Antithrombin III, thrombin regulation role, endothelial cell surfaces and, 373
- Apnea, swallowing during, preterm infants, 796
- Artery, *see also* specific type
myogenic response, fetal pulmonary hypertension and, 196
- Arthritis, rheumatoid, immunologic
development, tumor necrosis factor gene effects, autoimmunity and, 165
- Ascorbic acid, fruit drink containing, iron bioavailability measurement and, infant weaning foods, 389
- Asphyxia
cerebral energy failure and, hypothermia effects on, neonatal piglet, 667
fetal, cardiovascular system and CNS effects, 707
glial fibrillary acidic protein levels in cerebrospinal fluid, role, assessing, neonates, 260
perinatal, effects on central nervous system function, rats, 489
somatosensory evoked potentials and brain water content after, preterm piglets, 661
- Ataxia, NARP syndrome and, clinical symptoms relation to proportion of DNA carrying point mutation, 634
- Atrial natriuretic peptide
diastolic filling effects, chick embryo, 465
dietary sodium modulation, neonatal rats, 310
- Autoimmunity
epidermal growth factor, induction of, rats, 169
tumor necrosis factor and, sequence analysis, 165
- Autonomic nervous system, development and maturation, spectral analysis of heart rate fluctuations, 294
- Benzo[*a*]pyrene, neonatal administration, hepatic cytochrome P450 enzyme imprinting, adult rat, 646
- Bile acids, synthesis, inborn error of, familial giant cell hepatitis and, infant, 424
- Biopterin, neurologic disorders and, during methotrexate therapy for leukemia, 151
- Bisferiens peaks, radial artery pressure wave, role, marker of patent ductus arteriosus, neonates, 800
- Blood
cells, peripheral, fatty acid oxidation defects and, 354
hematopoietic progenitor cells, placental, hemoglobin expression after transplant, fetus, 432
oxygen, tension, inhaled nitric oxide effects on, preterm lambs, 35
sialyl Lewis^a antigen levels, infants and children with cystic fibrosis, 460
- Blood flow, cerebral, microvascular injury and, piglets, 10
- Body
fat-free mass, evaluating, total body electrical conductivity measurement role, infants, 94
whole, protein turnover, [¹⁵N]glycine and [¹⁻¹³C]leucine administration and, preterm infants, 381
- Bone marrow, G-CSF and neutrophil progenitors in, fetus, 806
- Brain
adrenal medulla, mRNA encoding tyrosine hydroxylase, dopamine β -hydroxylase, neuropeptide tyrosine, and prepro-enkephalin up-regulation in, postnatal oxygenation and, 701
cell membrane function, during hypoxia, hyperglycemic neonatal piglets, 133
c-fos, tyrosine hydroxylase and neuropeptide mRNA expression in, hypoxia and hypothermia effects, rat, 15
metabolic assessment during development, proton magnetic resonance spectroscopy, HPLC, and gas chromatography analysis, 145
phenylalanine levels and, proton nuclear magnetic resonance spectroscopy analysis, 244
water content, somatosensory evoked potentials and, after asphyxia, preterm piglets, 661
- Breast-feeding
celiac disease and, low incidence in The Netherlands, 213
dietary energy requirements of infant and, 239
- Breathing, periodic, swallowing during, preterm infants, 796
- Brush-border enzymes, development and control, small intestine, fetal pig, 207

- Calorimetry, indirect, energy expenditure measure, head injury effects, children, 409
- Carbohydrate, deficiency, glycoprotein syndrome type 1 and, endocrinology of, birth through adolescence, 395
- Cardiovascular drugs, effects on circulation and hemodynamics, chick embryo, 117
- Cardiovascular system, perinatal asphyxia effects on, fetal sheep, 707
- Catecholamines
adrenal, synthesis and release, splanchnic nerve regulation maturity, 701
chromogranin A and, levels at birth, mode of delivery effects on, 101
- Catheter
central venous, infections related to, *Staphylococcus epidermidis* virulence, 70
esophageal, chest wall distortion and, effects, esophageal manometry, preterm infant, 617
- Celiac disease, low incidence in The Netherlands, 213
- Central nervous system
disorders, phenylalanine levels and, proton nuclear magnetic resonance spectroscopy analysis, 244
function, perinatal asphyxia effects on, rats, 489
leukotrienes and, biosynthesis and pathophysiologic significance, 1
perinatal asphyxia effects on, fetal sheep, 707
- Cerebral energy failure/loss
cytochrome *aa*₃ reduction and, near-infrared spectroscopy measurement role in predicting, hypoxic piglets, 253
hypoxia-ischemia and, hypothermia effects on, neonatal piglet, 667
- Cerebrospinal fluid
G-CSF levels in, aseptic meningitis and, 160
glial fibrillary acidic protein levels, role, assessment of asphyxiated neonates, 260
- Cesarean section, effects, chromogranin A and catecholamine levels at birth, 101
- Chenodexoycholic acid, familial giant cell hepatitis effects, infant, 424
- Chest wall distortion, esophageal catheter position and, preterm infants on manometry, 617
- Children
malnourished, protein-energy, osteocalcin regulation and, 606
prepubertal, chronic renal failure, spontaneous nocturnal growth hormone secretion and, 86
- Cholecystokinin, somatostatin and, plasma levels, preterm infants and mothers at birth, 771
- Cholestasis, intrahepatic, familial giant cell hepatitis and, inborn error of bile acid synthesis, infant, 424
- Cholic acid, familial giant cell hepatitis effects, infant, 424
- Chromatography, high-performance liquid, brain, metabolic assessment during development, 145
- Chromogranin A, catecholamine, levels at birth, mode of delivery effects on, 101
- Circulation, pulmonary, inhaled nitric oxide effects, preterm lambs, 35
- Cognitive function
congenital hypothyroidism, children, 736
impairment, NARP syndrome and, clinical symptoms relation to proportion of DNA carrying point mutation, 634
- Colostrum, gastrointestinal tract and liver growth effects, neonatal pigs, 593
- Congenital malformations, diabetic pregnancy and, rats, 343
- Constipation, celiac disease and, low incidence in The Netherlands, 213
- Copper, plasma, antioxidant status and, children with Wilson's disease, 219
- Corticosterone, levels, interleukin-1 β effects, infant and prepubertal rats, 714
- Cortisol
gene expression of renin-angiotensin system effects, fetal sheep, 741
hemorrhage, renin response and gene expression to, fetal lambs, 316
plasma concentration, gestational age, postnatal age, and illness effects, preterm infants, 112
salivary, levels through childhood and adolescence, 502
small intestine brush-border enzyme development and control and, fetal piglets, 207
- Cystic fibrosis
hepatic glucose production, 600
serum sialyl Lewis^a antigen levels, infants and children, 460
- Cytochrome *aa*₃ reduction, near-infrared spectroscopy measurement, role, predicting cerebral energy loss, hypoxic piglets, 253
- Cytochrome P450, hepatic, enzyme imprinting, by neonatal benzo[*a*]pyrene administration, adult rat, 646
- Cytokine
expression, reverse transcriptase polymerase chain reaction detection, fetus, 450
- phenotype and responder cell frequency, preterm infants stimulated by staphylococcal enterotoxin B, 455
- production, T cells and, infant *versus* adult, 64
- Cytotoxicity, nitric oxide-induced, glutathione protective role and, 41
- Delivery, vaginal, *versus* cesarean section, effects, chromogranin A and catecholamine levels at birth, 101
- Development, *see also* Growth
brain, metabolic assessment during, proton magnetic resonance spectroscopy, HPLC, and gas chromatography analysis, 145
deranged, diabetic pregnancy and, rats, 343
fetal
epidermal growth factor deficiency, induction of, rats, 169
epidermal growth factor deficiency effects, rats, 175
protein C and, ovine, 365
heart, diastolic ventricular filling and, chick embryo, 289
kidney, furosemide treatment and angiotensin II effects, rat, 747
spatial learning, perinatal asphyxia effects on, 489
stomach, actin and myosin levels, 202
- Dexamethasone
lung antioxidant enzyme activity after hyperoxia effects, preterm infant, 469
thyrotropin and, effects, antioxidant enzyme activity, fetal rats, 611
- Diabetes
mellitus, cystic fibrosis and, 600
pregnancy and, congenital malformations, rats, 343
zinc absorption, metallothionein and cysteine-rich intestinal protein role, rats, 321
- Dietary energy, breast-feeding and, infants, 239
- 1,25-Dihydroxyvitamin D₃, calbindin-D_{9k} gene expression regulation and, rat chorioallantoic placenta, 720
- Ductus arteriosus
closure, smooth muscle migration and, transforming growth factor β ₁ inhibiting effects, fetal lamb, 561
patent, bisferiens peaks in radial artery pressure wave as marker of, neonates, 800
- Dystrophins, deletion-containing, expression in *mdx* muscle, gene therapy and dystrophin function implications, 693
- ECMO, *see* Oxygenation, extracorporeal membrane
- Edema, pulmonary, surfactant therapy effects, preterm infants, 265

- Electromyography, glottic closure during hypoxia, awake neonatal lambs, 482
- Electroretinogram, nonsteroidal antiinflammatory drug alterations, neonate, 81
- Embryo
atrial natriuretic peptide diastolic filling effects, chick, 465
diastolic ventricular filling, heart rate characteristics and, chick, 289
- Enalapril, effects, kidney growth and development, rat, 747
- Encephalomyopathy, necrotizing, NARP syndrome and, clinical symptoms relation to proportion of DNA carrying point mutation, 634
- β -Endorphin, levels, interleukin-1 β effects, infant and prepubertal rats, 714
- Endothelial cell, α_2 -macroglobulin and antithrombin III role, thrombin regulation, 373
- Endotoxin, lung antioxidant enzyme activity after hyperoxia effects, preterm infant, 469
- Energy expenditure
cerebral, asphyxia and, hypothermia effects on, neonatal piglet, 667
whole body, severe head injury effects, hormonal mediators and, children, 409
- Energy metabolism, myocardial, during pacing-induced changes in oxygen consumption, lambs, 182
- Epidemiology, celiac disease, low incidence in The Netherlands, 213
- Epidermal growth factor, biliary epithelial cells and, congenital polycystic kidney disease, 755
- Epidermal growth factors, deficiency effects during perinatal development, rats, 175
induction of autoimmunity, rats, 169
- Epithelial cells
biliary, congenital polycystic kidney disease and, 755
M-CSF factor identification in, 437
- Epithelial toxicity, alveolar, erythrocyte lysis and, pulmonary surfactant therapy effects on, 26
- Escherichia coli*, enteropathogenic, intestinal tract mucins and, 75
- Evoked potentials, *see* specific types
- Failure to thrive, HIV-infected, maternal-fetal interactions effects, 56
- Fatty acids
acyl-CoA dehydrogenase deficiency and, neonatal screening study in Pennsylvania, incidence and mutation frequency rates, 675
oxidation, peripheral blood cell levels, 354
polyunsaturated, leukotrienes and, 1
- Fetal alcohol syndrome, alcohol ingestion during pregnancy effects on heart vitamin A levels, fetal rats, 418
- Fetus
chromogranin A and catecholamine levels at birth, mode of delivery effects on, 101
cytokine expression, reverse transcriptase polymerase chain reaction detection, 450
ductus arteriosus closure and smooth muscle cell migration, transforming growth factor β_1 inhibiting effects, lambs, 561
G-CSF and neutrophil progenitors in liver and bone marrow, 806
growth and development
epidermal growth factor deficiency effects, rats, 175
epidermal growth factor deficiency induction, rats, 169
hemoglobin synthesis, $^G\gamma$ - and $^A\gamma$ -globins and, 361
hemorrhage, renin response and gene expression to, cortisol effects, lambs, 316
HIV-infected, maternal interactions with, effects, growth failure, 56
hypothyroidism, maternal-fetal transfer of thyroxine effects, rats, 497
maldevelopment, diabetic pregnancy and, rats, 343
nonshivering thermogenesis, adenosine inhibition role, sheep, 303
placental blood hematopoietic progenitor cell transplant, hemoglobin expression after, 432
placental glycine and leucine transport, 571
protein C development, ovine, 365
pulmonary hypertension, myogenic response of arterial vessels and, 196
renin-angiotensin system gene expression, cortisol effects, sheep
small intestine, brush-border enzyme development and control, piglets, 207
- Fibroblasts, cultured skin, auto-fluorescence of, mucopolipidosis 4 and, phenotypic marker identification, 687
- Fibronectin, levels, developing lung, rabbits, 189
- Fructose absorption, intestinal, dietary induction, weaning rats, 777
- Furosemide, angiotensin II and, effects, kidney growth and development, rat, 747
- Gastrointestinal tract
colostrum effects on growth, neonatal pigs, 593
differentiation, IGF-I and IGF-II effects, suckling rats, 586
disease, leukotrienes and, biosynthesis and pathophysiologic significance, 1
function, lecithin cholesterol acyl transferase activity and lipoprotein metabolism, preterm infants, 328
mucins, and enteropathogenic *Escherichia coli*, 75
- G-CSF, *see* Granulocyte colony-stimulating factor
- Gene expression
calbindin-D_{9K}, 1,25-dihydroxyvitamin D₃ regulation of, chorioallantoic placenta, rats, 720
renin-angiotensin system, cortisol effects, fetal sheep, 741
translational control, 681
- Gene therapy, deletion-containing dystrophin expression in *mdx* muscle, 693
- Genetic studies
 β -hydroxysteroid dehydrogenase gene, molecular basis and hormonal criteria, pubarche children and hirsute female patients, 820
hypothyroidism, cognitive function and, children, 736
NARP syndrome, clinical symptoms and proportion of mitochondrial DNA carrying 8993 point mutation, 634
polycystic kidney disease, epithelial hyperplasia and, 755
- Germ cell differentiation, mRNA translation control and, 681
- $^G\gamma$ - and $^A\gamma$ -globins, hemoglobin synthesis and, preterm infants, 361
- Glial fibrillary acidic protein, levels in cerebrospinal fluid, asphyxiated neonates, 260
- Glottic closure, hypoxia and, neonatal lambs, 482
- Glucose
hepatic production, children with cystic fibrosis, 600
turnover rate, alanine relationship, hepatic alanine metabolism during pregnancy and, rabbits, 764
- Glutathione, protective role, nitric oxide-induced cytotoxicity, 41
- Glycine, placental transport during pregnancy, 571
- [¹⁵N]Glycine, [¹⁻¹³C]leucine administration and, effects, whole-body protein turnover, preterm infants, 381
- Glycoprotein syndrome type 1, carbohydrate-deficient, endocrinology of, birth through adolescence, 395
- Granulocyte colony-stimulating factor cerebrospinal fluid levels, aseptic meningitis and, 160

- neutrophil pool sizes and, fetus, 806
 recombinant human, hematopoietic progenitor cells effects, 630
- Growth, *see also* Development
 failure, maternal-fetal interactions and, HIV-1 infected mice, 56
 gastrointestinal tract and liver, colostrum effects on, neonatal pigs, 593
 lung, infant, protein deficiency effects on, 783
- Growth hormone
 deficiency, growth hormone-binding protein and IGF-I level normalization after therapy, children, 731
 human, intestinal ion transport effects, rat, 576
 recombinant human, plasma growth hormone-binding protein and IGF-I levels, Turner's syndrome, 106
 spontaneous nocturnal secretion, chronic renal disease and, prepubertal children, 86
- Haemophilus influenzae*, nontypable, lymphotoxin effects, neutrophil-mediated killing, 155
- Head injury, effects, whole body energy expenditure and, hormonal mediators and, children, 409
- Heart
 diastolic filling, atrial natriuretic peptide effects, chick embryo, 465
 pacemaker derived from fetal rat myocardium, 283
- Heart rate
 diastolic ventricular filling and, chick embryo, 289
 pacing-induced changes, myocardial energy metabolism during, neonatal lambs, 182
 striatum damage and, asphyxia effects on, fetal sheep, 707
 variability
 artificial ventilation effects, very preterm infants, 124
 spectral analysis of, autonomic nervous system development and maturation, 294
- Hemodynamics, cardiovascular drugs, effects on circulation and hemodynamics, chick, 117
- Hemoglobin
 expression, after transplant of placental blood hematopoietic progenitor cells, fetus, 432
 synthesis, α - γ - and Λ - γ -globins and, preterm infants, 361
- Hemorrhage
 pulmonary, surfactant therapy effects on risk, VLBW infant with RDS, 26
 renin response and gene expression, cortisol effects, fetal lambs, 316
- Hemostatic system, protein C development, ovine fetus, 365
- Hepatitis, familial giant cell, bile acid synthesis and, infant, 424
- HIV, *see* Human immunodeficiency virus
- Hormones, *see also* specific types
 mediators, severe head injury effects, whole body energy expenditure and, children, 409
- HPLC, *see* Chromatography, high-performance liquid
- Human immunodeficiency virus, maternal-fetal interactions effects, growth failure, 56
- Hydrophobicity, skin surface, prenatal steroids effects, preterm rats, 402
- 3 β -Hydroxysteroid dehydrogenase, gene, molecular basis and hormonal criteria, pubarche children and hirsute female patients, 820
- Hyperglycemia, brain cell membrane function during hypoxia, neonatal piglets, 133
- Hyperoxia
 antioxidant enzyme activity and, thyrotropin and dexamethasone effects, fetal rats, 611
 lung antioxidant enzyme activity after, gene expression and endotoxin and dexamethasone treatment, preterm rabbits, 469
- Hyperphenylalaninemia, phenylalanine levels and, proton nuclear magnetic resonance spectroscopy analysis, 244
- Hyperplasia
 congenital adrenal, 3 β -hydroxysteroid dehydrogenase deficiency, molecular basis and hormonal criteria, 820
 epithelial, congenital polycystic kidney disease and, 755
- Hypertension
 persistent pulmonary of newborn, urinary nitrite and nitrate concentrations, ECMO effects, 31
 pulmonary, myogenic response of arterial vessels and, fetus, 196
- Hypoglycemia, acyl-CoA dehydrogenase deficiency and, neonatal screening study in Pennsylvania, incidence and mutation frequency rates, 675
- Hypotension, cerebral vasodilation and, endothelial injury effects, piglets, 10
- Hypothermia
 after asphyxia, effects on cerebral energy failure, neonatal piglet, 667
 effects, *c-fos*, neuropeptide mRNA and tyrosine hydroxylase expression, rat brain around birth, 15
- Hypothyroidism
 congenital, neurophysiologic analysis and cognitive function, children, 736
in utero, maternal-fetal transfer of thyroxine effects, rat, 497
- Hypoxia
 brain cell membrane function during, hyperglycemic neonatal piglets, 133
 cerebral energy loss and, cytochrome *aa*₃ reduction, near-infrared spectroscopy measurement role in predicting, piglets, 253
 effects, *c-fos*, neuropeptide mRNA and tyrosine hydroxylase expression, rat brain around birth, 15
 laryngeal response, neonatal lambs, 482
 ventilatory response to, nicotine effects, lambs, 652
- IGF, *see* Insulin-like growth factor
- Immune system
 interleukin-10 levels in human milk, 444
 M-CSF identification in human milk and epithelial cells, 437
- Immunity, interleukin-1 receptor antagonist, levels in neonatal sepsis, 626
- Immunization, rubella, virus growth *in vitro*, cord blood mononuclear cells effects, 623
- Immunoglobulin antibody, responses to pneumococcal polysaccharide vaccine, patients with recurrent respiratory tract infection, 812
- Immunologic development, perinatal, tumor necrosis factor gene effects, autoimmunity and, 165
- Incubator, water loss from skin, term and preterm infants, 233
- Infant
 body fat-free mass evaluations, total body electrical conductivity role, 94
 breast-fed, dietary energy requirements and, 239
 familial giant cell hepatitis, bile acid synthesis and, 424
 glycoprotein syndrome type 1, endocrinology of, 395
 HIV-infected, growth failure and, maternal-fetal interactions effects, 56
 interleukin-1 β effects, ACTH, β -endorphin, and corticosterone levels, rats, 714
 lung growth, protein deficiency effects on, 783
 M-CSF identification in human milk and epithelial cells, 437
 nutrition
 intestinal fructose absorption, dietary induction, weaning rats, 777

- weaning foods, iron bioavailability measurement and, 389
- prenatally exposed to alcohol, heart vitamin A levels and, relation to fetal alcohol syndrome, rats, 418
- prenatally exposed to nicotine, hyperventilatory response to hypoxemia and, SIDS relation, 652
- preterm
- cholecystokinin and somatostatin levels, at birth, 771
 - esophageal manometry, chest wall distortion effects on, 617
 - hemoglobin synthesis, γ - and α -globins and, 361
 - hyperoxia, lung antioxidant enzyme activity after, gene expression and endotoxin and dexamethasone treatment, 469
 - IGF-I and IGF-binding protein, during first year, 581
 - inhaled nitric oxide effects on pulmonary circulation, lambs, 35
 - lipoprotein metabolism and, lecithin cholesterol acyl transferase activity, 328
 - lung vascular injury and edema, surfactant treatment effects, 265
 - plasma cortisol concentrations, gestational age, postnatal age, and illness effects, 112
 - prenatal steroids effects on skin surface hydrophobicity, rats, 402
 - swallowing during apnea and periodic breathing, comparison study, 796
 - visual development, pattern visual evoked potential evaluation, 140
 - water loss from skin, incubator and radiant heater and, 233
 - whole-body protein turnover, [^{15}N]glycine and [$1\text{-}^{13}\text{C}$]leucine administration and, 381
- respiratory failure, exogenous surfactant therapy, second dose distribution, rabbits, 476
- stomach development, actin and myosin levels, 202
- T cells and cytokine expression, *versus* adult, 64
- very low birth weight
- intestinal fructose absorption, dietary induction, weaning rats, 777
 - RDS and, surfactant effects, pulmonary hemorrhage risk, 26
 - very preterm, artificial ventilation effects, heart rate variability, 124
- Infection, catheter-related, *Staphylococcus epidermidis* virulence, 70
- Insulin-like growth factor
- gastrointestinal tract differentiation and, suckling rats, 586
 - plasma, maternal protein malnutrition effects, fetal rats, 334
- Insulin-like growth factor-I
- IGF-binding protein and, during first year, term and preterm infants, 581
 - levels
 - growth-hormone deficient children after therapy, 731
 - recombinant human growth hormone therapy effects, Turner's syndrome patients, 106
- Interleukin-1 β , effects, plasma ACTH, β -endorphin, and corticosterone levels, infant and prepubertal rats, 714
- Interleukin-10, levels in human milk, 444
- Interleukin-1, receptor antagonist, levels in neonatal sepsis, 626
- Intestinal protein, role, zinc absorption, diabetic rats, 321
- Intestinal tract, mucins, and enteropathogenic *Escherichia coli*, 75
- Intestine
- ion transport, human growth hormone effects on, rat, 576
 - small, brush-border enzyme development and control, fetal pig, 207
- Ion transport, intestinal, growth hormone effects on, rat, 576
- Iron deficiency, bioavailability measurement in infant weaning foods, 389
- Kidney
- disease, congenital polycystic, epithelial hyperplasia and, 755
 - growth and development, furosemide treatment and angiotensin II effects, rat, 747
 - taurine transport regulation, medium osmolality effects, 227
- Learning, spatial, perinatal asphyxia effects, rats, 489
- Lecithin cholesterol acyl transferase, lipoprotein metabolism and, preterm infants, 328
- Leucine
- metabolism, 3-methylglutaconic acidemia and Smith-Lemli-Opitz syndrome, 671
 - placental transport during pregnancy, 571
- Leukemia, methotrexate therapy, neurologic disorders and, bioperin and biogenic amine metabolism effects on, 151
- Leukotrienes, biosynthesis, metabolism, and pathophysiologic significance, 1
- Lipid storage, mucopolipidosis 4 and, auto-fluorescence of cultured skin fibroblasts, phenotypic marker identification, 687
- Lipoprotein metabolism, lecithin cholesterol acyl transferase activity and, preterm infants, 328
- Liver
- alanine metabolism, during pregnancy, glucose turnover rate and, rabbits, 764
 - colostrum effects on growth, neonatal pigs, 593
 - cytochrome P450 enzyme imprinting, neonatal administration of benzo[a]pyrene and, 646
 - damage, copper accumulation and, children with Wilson's disease, 219
 - function, familial giant cell hepatitis effects, inborn error of bile acid synthesis, infant, 424
 - G-CSF and neutrophil progenitors in, fetus, 806
 - glucose production, children with cystic fibrosis, 600
 - transplantation, tyrosinemia, type I nephropathy after, 640
- Lung
- development, fibronectin expression in, rabbits, 189
 - disease, leukotrienes and, biosynthesis and pathophysiologic significance, 1
 - failure, exogenous surfactant therapy, second dose distribution, rabbits, 476
 - growth, infant, protein deficiency effects on, 783
 - injury, surfactant treatment effects, preterm infants, 265
- Lymphocytes, responder cell frequency, preterm infants stimulated by staphylococcal enterotoxin B, 455
- Lymphotoxin, effects, neutrophil-mediated killing of nontypable *Haemophilus influenzae*, 155
- α_2 -Macroglobulin, thrombin regulation role, endothelial cell surfaces and, 373
- Macrophage colony-stimulating factor, identification in human milk and epithelial cells, 437
- Malnutrition, protein-energy, osteocalcin regulation and, children, 606
- Manometry, esophageal, chest wall distortion effects on, preterm infants, 617
- Maternal protein, malnutrition, effects, fetal growth, rats, 334
- Maternal-fetal interactions
- cytokine expression, reverse transcriptase polymerase chain reaction detection, 450
 - failure to thrive, HIV-infected fetus, 56
 - thyroxine transfer, effects on *in utero* hypothyroidism, rats, 497

- M-CSF, *see* Macrophage colony-stimulating factor
- mdx* muscle, deletion-containing dystrophin expression in, gene therapy and dystrophin function implications, 693
- Medulla, adrenal, mRNA encoding tyrosine hydroxylase, dopamine β -hydroxylase, neuropeptide tyrosine, and prepro-enkephalin up-regulation, postnatal oxygenation and, 701
- Meningitis, aseptic, G-CSF levels in cerebrospinal fluid and, 160
- Metabolism, *see also* specific types hepatic alanine, plasma disposal rate and, pregnant rabbits, 764 inborn errors of, fatty acid oxidation defects and, 354
- Metallothionein, role, zinc absorption, diabetic rats, 321
- Methotrexate, leukemia therapy, neurologic disorders and, bipterin and biogenic amine metabolism effects on, 151
- Microvascular injury, effects, arteriolar dilation, hypotensive piglets, 10
- Milk
colostrum, gastrointestinal tract and liver, effects on growth, 593
human
interleukin-10 levels in, 444
M-CSF identification in, 437
production
protein deficiency effects, morphometric analysis, infant rats, 783
protein deficiency effects on, 783
- Mitochondria
disorder, maternally inherited, clinical symptoms and proportion of mitochondrial DNA carrying 8993 point mutation, 634
renal tubular, 1,25(OH)₂D production regulation, calcium attenuation, vitamin D-deprived rats, 726
- Morphogenesis, tissue, fibronectin levels in developing lung, rabbits, 189
- Morphometric analysis, protein deficiency effects, milk production and infant lung growth, 783
- Motor disorders, fine, congenital hypothyroidism and, neurophysiologic analysis and cognitive function, 736
- mRNA, *see* Ribonucleic acid, messenger
- Mucopolysaccharidosis 4, auto-fluorescence of cultured skin fibroblasts, phenotypic marker identification, 687
- Muscular dystrophy, Becker, dystrophin deficiency and, deletion-containing dystrophin expression *mdx* muscle, gene therapy and dystrophin function implications, 693
- Myocardium, pacemaker derived from, fetal rat, 283
- Myocytes, ventricular, triiodothyronine effects on β -adrenergic responsiveness retention, neonatal rabbits, 277
- Myogenic response, arterial vessels, fetal pulmonary hypertension and, 196
- Myosin, developing stomach and, 202
- NARP syndrome, *see* Neurogenic muscle weakness, ataxia, retinitis pigmentosa syndrome
- Neonate
acyl-CoA dehydrogenase deficiency, screening study in Pennsylvania, incidence and mutation frequency rates, 675
asphyxia
effects on central nervous system function, rats, 489
glial fibrillary acidic protein levels in cerebrospinal fluid, role in assessing, 260
atrial natriuretic peptide, dietary sodium modulation, rats, 310
brain cell membrane function during hypoxia, hyperglycemic piglets, 133
gastrointestinal tract and liver, colostrum effects on growth, 593
hypoxia, glottic closure and, awake neonatal lambs, 482
oxygen consumption, pacing-induced changes, myocardial energy metabolism during, lambs, 182
patent ductus arteriosus, bisferiens peaks in radial artery pressure wave, role as marker, 800
retinal prostaglandin levels, nonsteroidal antiinflammatory drug effects on, 81
screening, congenital hypothyroidism, neurophysiologic analysis and cognitive function, 736
sepsis, interleukin-1 receptor antagonist levels, 626
ventricular myocyte culture, triiodothyronine effects on β -adrenergic responsiveness retention, 277
- Nephropathy, tyrosinemia, type I, after liver transplantation, 640
- Neurogenic muscle weakness, ataxia, retinitis pigmentosa syndrome, clinical symptoms relation to proportion of DNA carrying point mutation, 634
- Neurologic impairment, glycoprotein syndrome type 1 and, endocrinology of, birth through adolescence, 395
- Neurophysiologic analysis, congenital hypothyroidism, children, 736
- Neutrophils
cerebrospinal fluid levels, during aseptic meningitis, 160
effects, nontypable *Haemophilus influenzae* killing, 155
G-CSF production and, liver and bone marrow, fetus, 806
- Nitrate, concentrations, PPHN and ECMO effects, 31
- Nitric oxide
cytotoxicity and, oxidative stress and glutathione protective role, 41
inhaled, effects, pulmonary circulation, preterm lambs, 35
- Nitrite, urinary, concentrations, PPHN and ECMO effects, 31
- Nutrition
breast-feeding and, energy requirements for infants, 239
infant weaning foods, iron bioavailability measurement and, 389
intestinal fructose absorption, weaning rats, 777
malnutrition, protein-energy, osteocalcin regulation, children, 606
maternal dietary protein malnutrition, effects, fetal growth, rats, 334
protein deficiency, effects, milk production and infant lung growth, 783
whole body energy expenditure, severe head injury effects, children, 409
- Nutritional assessment, fat-free mass evaluation, total body electrical conductivity measurement role, infants, 94
- Osmolality, medium, taurine transport regulation and, 227
- Osteocalcin, regulation, protein-energy malnutrition, children, 606
- Otitis media, nontypable *Haemophilus influenzae* and, lymphotoxin and TNF effects on, 155
- Oxidation
fatty acid, peripheral blood cell levels, role, detecting defects, 354
mitochondrial, fatty acids, acyl-CoA dehydrogenase deficiency and, neonatal screening study in Pennsylvania, incidence and mutation frequency rates, 675
- Oxygen consumption, pacing-induced changes, myocardial energy metabolism during, neonatal lambs, 182
- Oxygenation
extracorporeal membrane, effects, urinary nitrite and nitrate

- concentrations, persistent pulmonary hypertension of newborn, 31
- postnatal, mRNA encoding tyrosine hydroxylase, dopamine β -hydroxylase, neuropeptide tyrosine, and prepro-enkephalin up-regulation in adrenal medulla, 701
- Pacemaker, derived from fetal rat myocardium, 283
- Parathyroid hormone, growth-promoting actions, T-lymphoblast cell lines, 507
- Pathophysiology, leukotrienes, 1
- Pediatric Research, academic bulletin board, 512
- Phenylalanine, levels in brain, proton nuclear magnetic resonance spectroscopy analysis, 244
- Placenta, chorioallantoic, 1,25-dihydroxyvitamin D₃ calbindin-D_{9K} gene expression regulation and, rat, 720
- Placental tissue, cytokine expression, reverse transcriptase polymerase chain reaction detection, 450
- Plasma protein, inhibitory effects, surfactant activity, surfactant apoprotein A role, 21
- Pneumotachography, glottic closure during hypoxia, awake neonatal lambs, 482
- Polymerase chain reaction reverse transcriptase, fetal cytokine expression detection, 450 tumor necrosis factor gene analysis, autoimmunity and, 165
- PPHN, *see* Hypertension, persistent pulmonary of newborn
- Pregnancy alcohol ingestion during, effects, heart vitamin A levels, fetal alcohol syndrome and, rats, 418 diabetic, congenital malformations and, rats, 343 placental glycine and leucine transport during, 571 plasma disposal rate and hepatic alanine metabolism, rabbits, 764
- Prostaglandin levels, retinal, nonsteroidal antiinflammatory drug effects on, neonates, 81
- Protein deficiency, effects on milk production and infant lung growth, 783 malnutrition, maternal, effects, fetal growth, rats, 334 turnover, whole-body, [¹⁵N]glycine and [1-¹³C]leucine administration and, preterm infants, 381
- Protein C, fetal development of, ovine fetus, 365
- Pubarche children, 3 β -hydroxysteroid dehydrogenase gene, molecular basis and hormonal criteria, 820
- Radial artery, pressure wave, bisferiens peaks, role, marker of patent ductus arteriosus, neonates, 800
- Radiant heater, water loss from skin, term and preterm infants, 233
- Radioimmunoassay, IGF-I and IGF-binding protein 3, term and preterm infants, during first year, 581
- RDS, *see* Respiratory distress syndrome
- Renal disease, spontaneous nocturnal growth hormone secretion and, prepubertal children, 86
- Renal failure, chronic, spontaneous nocturnal growth hormone secretion and, prepubertal children, 86
- Renin-angiotensin system gene expression, cortisol effects, fetal sheep, 741 hemorrhage and, cortisol effects, fetal lambs, 316
- Respiratory distress syndrome artificial ventilation effects on heart rate variability, very preterm infants, 124 surfactant apoprotein A role, plasma protein inhibitory effects on surfactant activity, 21
- Respiratory failure, exogenous surfactant therapy, second dose distribution, rabbits, 476
- Respiratory tract, infection, recurrent, immunoglobulin antibody responses to pneumococcal polysaccharide vaccine, 812
- Retinitis pigmentosa, NARP syndrome and, clinical symptoms relation to proportion of DNA carrying point mutation, 634
- Ribonucleic acid, messenger, translation regulation, gene expression control and, 681
- RNA, *see* Ribonucleic acid
- Rubella, vaccine virus, growth and passage, effects, cord blood mononuclear cells, 623
- Saliva, cortisol levels through childhood and adolescence, 502
- Sepsis, neonatal, interleukin-1 receptor antagonist levels in, 626
- Sialyl Lewis^x antigen, levels, infants and children with cystic fibrosis, 460
- SIDS, *see* Sudden infant death syndrome
- Skin disease, leukotrienes and, biosynthesis and pathophysiologic significance, 1 fibroblasts, cultured, auto-fluorescence, mucopolipidosis 4 patients, 687 surface hydrophobicity, prenatal steroids effects, preterm rats, 402
- Smith-Lemli-Opitz syndrome, 3-methylglutaconic acidemia and, 671
- Smooth muscle cells, migration, ductus arteriosus closure and, transforming growth factor β ₁ inhibiting effects, fetal lamb, 561
- Sodium, dietary, role, modulating atrial natriuretic peptide, neonatal rats, 310
- Somatosensory, evoked potentials, brain water content and, preterm piglets after asphyxia, 661
- Somatomedin, cholecystokinin and, levels, preterm infants and mother at birth, 771
- Spectral analysis, heart rate variability, autonomic nervous system development and maturation and, 294
- Spectroscopy near-infrared, cytochrome *aa*₃ reduction analysis, role, predicting cerebral energy loss, hypoxic piglets, 253 proton magnetic resonance, brain, metabolic assessment during development, 145 proton nuclear magnetic resonance, phenylalanine levels in brain measurement, 244
- Staphylococcal enterotoxin B, T cell cytokine phenotype and frequency, preterm infants, 455
- Staphylococci, coagulase-negative, catheter-related infections and, 70
- Staphylococcus epidermidis*, virulence, catheter-related infections and, 70
- Stature idiopathic short, spontaneous nocturnal growth hormone secretion and, prepubertal children, 86 short, plasma growth hormone-binding protein and IGF-I levels, after recombinant human growth hormone therapy, Turner's syndrome patients, 106
- Steroids, prenatal, skin surface hydrophobicity effects, preterm rats, 402
- Stomach, development, actin and myosin levels, 202
- Striatum, damage, heart injury and, umbilical cord occlusion effects, fetal sheep, 707
- Sudden infant death syndrome, hypoxemia and, hyperventilatory response, maternal smoking as risk factor, 652
- Surfactant apoprotein A, effects, plasma protein inhibitory effects, surfactant activity, 21

- exogenous, respiratory failure therapy, second dose distribution, rabbits, 476
- protein B, natural surfactant and, functional effects, 271
- therapy
 lung vascular injury and edema effects, preterm infants, 265
 pulmonary hemorrhage risk and, VLBW infant with RDS, 26
- Swallowing, during apnea and periodic breathing, comparison study, preterm infants, 796
- T cells
 cytokine phenotype and frequency, preterm infants responding to staphylococcal enterotoxin B, 455
 cytokine production and expression, infant *versus* adult, 64
- Taurine transport, regulation, medium osmolality effects, 227
- Thermogenesis, nonshivering, adenosine inhibiting role, fetal sheep, 303
- Thrombin regulation, α_2 -macroglobulin and antithrombin III role, endothelial cell surfaces and, 373
- Thyroid-stimulating hormone, growth-promoting actions, T-lymphoblast cell lines, 507
- Thyrotropin releasing hormone, prenatal administration, lung antioxidant enzyme activity effects, fetal rats, 611
- Thyroxine, maternal-fetal transfer, effects on *in utero* hypothyroidism, rats, 497
- T-lymphoblasts, growth-promoting actions of parathyroid, adrenocorticotrophic, and thyroid-stimulating hormones, 507
- TNF, *see* Tumor necrosis factor
- Total body electrical conductivity, role, measuring body fat-free mass, infants, 94
- Transplant, placental blood hematopoietic progenitor cells, hemoglobin expression after, fetus, 432
- Triiodothyronine, β -adrenergic responsiveness retention, during ventricular myocyte culture, neonatal rabbits, 277
- Tumor, malignant, methotrexate therapy, neurologic disorders and, biopterin and biogenic amine metabolism effects on, 151
- Tumor necrosis factor
 effects, neutrophil-mediated killing of nontypable *Haemophilus influenzae*, 155
 gene, autoimmunity and, sequence analysis, 165
- Turner's syndrome, plasma growth hormone-binding protein and IGF-I levels, after recombinant human growth hormone therapy, 106
- Tyrosine hydroxylase, *c-fos*, neuropeptide mRNA and, expression in rat brain around birth, hypoxia and hypothermia effects, 15
- Tyrosinemia, type I, nephropathy, after liver transplantation, 640
- Umbilical cord
 blood, mononuclear cells, effects, rubella vaccine virus growth and passage, 623
 occlusion, striatal damage and heart injury and, fetal sheep, 707
- Vaccine
 pneumococcal polysaccharide, immunoglobulin antibody responses, patients with recurrent bacterial respiratory tract infections, 812
- rubella, virus growth and passage, umbilical cord blood mononuclear cells effects, 623
- Vascular resistance, pulmonary, inhaled nitric oxide effects on, preterm lambs, 35
- Vasodilation, cerebral, hypotension and, endothelial injury effects, piglets, 10
- Venodilation, atrial natriuretic peptide effects, chick embryo, 465
- Ventilation
 artificial, effects, heart rate variability, very preterm infants, 124
 surfactant therapy and, surfactant protein B and natural surfactant, 271
- Ventricular filling, diastolic, heart rate characteristics, chick embryo, 289
- Visual development, pattern visual evoked potential evaluation, preterm infants, 140
- Visual evoked potential, pattern, maturation, preterm infants, 140
- Visual impairment, mucopolidosis 4 and, phenotypic marker identification, 687
- Vitamin A, heart levels, alcohol ingestion during pregnancy effects, fetal alcohol syndrome and, rats, 418
- Vitamin D, deficiency, 1,25(OH)₂D production and, rats, 726
- VLBW, *see* Infant, very low birth weight
- Water loss, skin
 incubator and radiant heater, term and preterm infants, 233
 prenatal steroids effects, preterm rats, 402
- Wilson's disease, plasma copper and antioxidant status, 219
- Zinc, absorption, metallothionein and cysteine-rich intestinal protein role, diabetic rats, 321
