Journal of Human Hypertension (2022) 36:943; <https://doi.org/10.1038/s41371-022-00727-4>Correction to: *Journal of Human Hypertension* <https://doi.org/10.1038/s41371-022-00692-y>, published online 05 May 2022

The original article has been corrected.

The original version of this article contained a mistake. Owing to a typesetting error, the definition of High blood pressure missed the following “or who reported having been diagnosed with hypertension by a health professional” in the published article.

The correct definition of High blood pressure is mentioned below.

High BP was defined as systolic blood pressure (SBP) ≥ 140 mmHg or diastolic blood pressure (DBP) ≥ 90 mmHg (based on the mean of the 2nd and 3rd measurements of BP based on the minimum percentage regression to mean (SBP: 5.8% and DBP: 9.9%) compared to other two measurement combination) or the participants who reported being currently on medications for raised BP or who reported having been diagnosed with hypertension by a health professional.
