Correction to: *Oncogene*

<https://doi.org/10.1038/onc.2008.356>

Following the publication of this Article, it was brought to the attention of the Authors that a control for shRNA knock-down of Id2 in Fig. 2 was a duplicated and reversed set of bands from another control in the Figure. The row of bands

on the western blot for Id3 is the same blot for Id1 knock-down, but “flipped” horizontally. This does not change the conclusions of the manuscript. The authors have submitted a revised Fig. 2, omitting this band, as they no longer have access to the reagents and cannot repeat this part of the experiment.

Fig. 2
