Unfortunately, an error occurred in Fig. 3. The correct Fig. 3 is given below.

Fig. 3 Overexpression of LACTB suppresses CRC cell tumorigenicity in vitro. **A** Ectopic LACTB expression in HCT116 and HCT8 cell lines were measured by immunoblot. GAPDH was used as a loading control. **B** Representative images (left panel) and quantification (right panel) of colony formation assay. The number of colonies with >50 cells was scored after 10-day incubation. **C** CCK-8 assay was used to determine the proliferation effect of LACTB overexpression on HCT116 and HCT8 cells. **D** EdU (5-ethynyl-2'-deoxyuridine) assay was conducted to assess the effect of LACTB overexpression on DNA

synthesis in HCT116 and HCT8 cells. Representative images and corresponding statistical plots were presented. Scale bar = 20 μ m. **E**, **F** Flow cytometric analysis of cell cycle and apoptosis. Representative images and corresponding statistical plots were presented. **G**, **H** The representative pictures and quantification of migrated and invaded cells. Scale bar = 50 μ m. Data were represented as means $\pm$ S.D. of at least three independent experiments. * p < 0.05; ** p < 0.01; *** p < 0.001.
