When sorting out the original data, the authors noted the representative immunohistochemistry image of integrin β 1 for the

integrin β 1 group in Fig. 4F was mistakenly uploaded when assembling the figure. Although this does not affect the final conclusion, we are still sorry for our mistake.

F

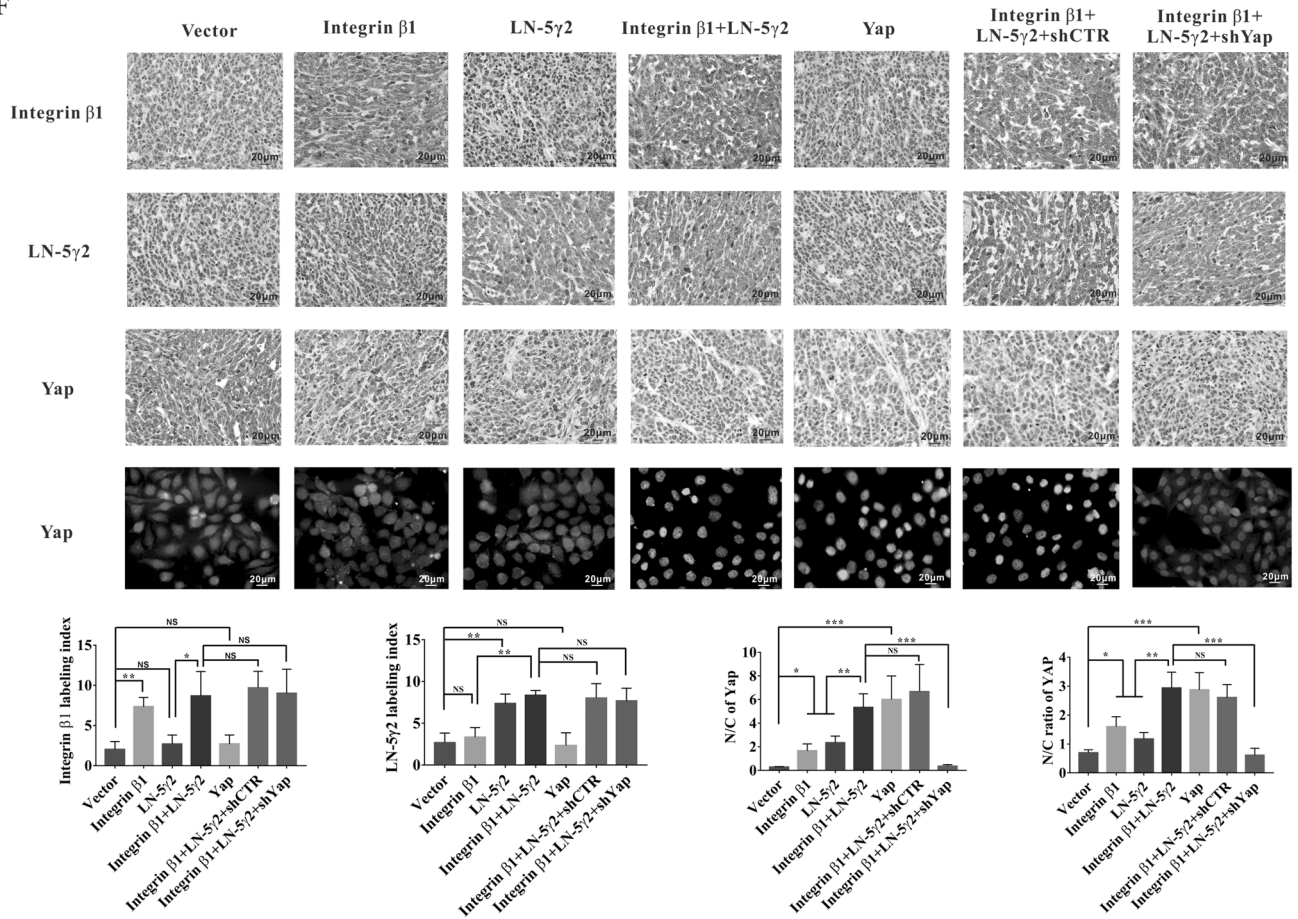

Fig. 4 Interaction of Integrin β1 and LN-5γ2 promoted TB and aggressiveness of CRC cells by activation of YAP. **f** Increased expression of nucleus YAP can be found in the Integrin β1 and LN-5γ2 co-overexpressed xenograft tissues by IF and IHC analysis.
