

**CORRECTION**

# Correction: Residential dust lead levels and the risk of childhood lead poisoning in United States children

Joseph M. Braun, Kimberly Yolton, Nicholas Newman, David E. Jacobs, Mark Taylor and Bruce P. Lanphear

*Pediatric Research* (2021) 90:922; <https://doi.org/10.1038/s41390-020-01229-0>

Correction to: *Pediatric Research* <https://doi.org/10.1038/s41390-020-1091-3>, published online 28 July 2020

Following publication of this article, the authors noticed that the units in Table 1 were incorrect. Dust lead loadings were measured

in micrograms per square foot ( $\mu\text{g}/\text{ft}^2$ ), and not milligrams per square foot ( $\text{mg}/\text{ft}^2$ ).

This has now been corrected in both the PDF and HTML versions of this article.
