

Always have a vision

The handpieces in the Synea Vision range, proudly designed by W&H, can meet even the highest demands.

The range consists of both straight and contra-angled handpieces, which boasts uncompromising quality and technology,

excellent ergonomics, scratch-resistant surfaces and an option of four turbine head sizes to meet individual needs. Plus, due to the ceramic ball bearings and smart gearing technology, the Synea Vision handpieces delivers optimum cooling and quiet, comfortable operation, helping to increase patient and user comfort. In addition, the five ring LED offers shadow free illumination.

With many potential challenges in dentistry, investing in equipment that is versatile, innovative and comfortable is a no-brainer.

A great dentist needs a mentor

A great mentor is something every dentist should have by their side.

When you embark on additional training, this can be a way to find a mentor who will guide and inspire you, long after the course has completed.

For quality training in implant therapy, One to One Education offers programmes delivered by experienced practitioners, instructors and mentors.

Training is overseen by Dr Fazeela Khan-Osborne, a leading clinician, lecturer and mentor known across the field for her exceptional skill and experience.

You will acquire more than just the skills to place implants safely and confidently; you will gain a valuable addition to your professional network.

There are no limits on learning. To find out more about One to One Education, or to reserve your place, visit <https://www.implantcourse.co.uk/our-courses/project-one-7kpx> or call 020 7486 0000.

Time to smile!

Premium brand TANDEX wants to *keep your patients smiling*.

We produce quality brushes and adjuncts that are comfortable to use.

TANDEX is a family-run business that cares deeply not just about people, but the planet too. We are committed to achieving carbon neutrality, we source sustainable materials to make our products and are a member of global projects that fight the impact of pollution and climate change.

From our WOODI interdental tool to the SOLO interspace brush, TANDEX will empower your patients to optimise their health and wellbeing.

For more information on Tandex, visit <https://tandex.dk/> or the Facebook page <https://www.facebook.com/TandexUK>.

Tandex products are now available from CTS Dental Supplies <https://www.cts-dental.com/> and DHB Oral Healthcare <https://dhb.co.uk/>.

Win the battle against bacteria

Every clinician wants their patients to have the best experience, especially when it comes to invasive procedures.

Bacteria can dampen this with the risk they pose for infection. The 'Perio plus' Forte oral rinse could be the product that allows you to rest assured that your patients are protected.

It offers protection against bacteria and prevents the formation and accumulation of plaque. It contains Chlorhexidine 0.2% and

CITROX to provide longer-term protection against bacteria. So, if your patients use the rinse before and after an invasive procedure they will have a higher chance of a successful recovery.

Use 'Perio plus' Forte and provide your patients with the pre and post-oral surgery protection they deserve.

For more information call 01480 862084, email info@curaprox.co.uk or visit www.perioplus.com/uk.
