## A truly comprehensive solution

The Straumann Group is proud to offer a truly comprehensive suite of solutions designed to optimise workflows and help dental teams deliver exceptional treatment outcomes for a wide range of patients.

The expert team will be attending the BDCDS 2022 in May, demonstrating both the science behind the products available and the benefits they afford to you and your patients. Discover the latest implant systems in a long line of innovative products, including the Straumann BLX and TLX implants designed to optimise outcomes in both conventional and immediate indications.

Complementing the implant systems perfectly are various digital solutions that facilitate a seamless workflow for clinicians. Solutions such as the Smile in a Box service, a range of intraoral scanners and advanced chairside milling machines might be just what you need to elevate standards in your practice.

Plus, find out more about the extensive educational courses and learning opportunities supported and presented by the Straumann Group for the whole team. Don't miss out – visit us on stand **F30** at the BDCDS 2022.

## Perfecting the art of dentistry

Belmont's new Eurus S6 treatment centre exudes refinement and brings the next level of ultrasoft comfort, quality, innovation and style to contemporary dentistry.

The super-efficient design offers total accessibility for both patient and operator alike, allowing effortless working positions alongside discreet clean and preparation zones.

The contemporary Eurus S6 has the Belmont renowned below-the-patient swing-arm delivery system, powerful intuitive touch-screen with advanced instrument control and integrated WaveOne technology as a factory built-in option.

The clear and logical touchscreen offers one touch control across a wide range of functions, with an easy-to-read display that tells you all you need to know at a glance. You can pre-programme settings or restore to standard in just one touch. As a combination this brings a wealth of operating options to the

fingertips of the dentist.

Uniquely, this treatment centre allows positioning of the doctor table, instruments and assistant tray discreetly out of view behind the chair backrest, easing any patient anxiety as they enter the surgery. Smooth quiet chair movement ensures complete patient comfort, whilst the robust construction enables the Eurus S6 to have a maximum safe working patient weight of 165Kg.

## Always by your side

Dentists' Provident was started by dentists over 110 years ago as a membership organisation to protect each other from the financial consequences of illness or injury.

We have been part of the profession ever since, working together to support dental professionals, with our highly flexible plans which are designed to be as individual as they are. Our income protection plans can take away the worry by helping to replace the income you lose, until life gets back to normal. We are still owned and run by our members, and with no external stakeholders, they are at the heart of everything we do.

We take enormous pride in our reputation for honesty, integrity, and fairness in how we conduct our day-to-day business. In 2021 our claims pay ratio was 98.9%. We are there when members need us, from university to retirement and beyond.

To get an instant online quote for an income protection plan, visit [www.dentistsprovident.co.uk](http://www.dentistsprovident.co.uk)

To discuss a new plan just for you or review your current plan, please contact our member services consultants by calling 020 7400 5710 or on [memberservices@dentistsprovident.co.uk](mailto:memberservices@dentistsprovident.co.uk).
